

GOVERNMENT MAY STOP FOOTBALL BY CADETS AT WEST POINT AND ANNAPOLIS

Accident to Byrne Causes Sensation Throughout the Country.

West Point Had Pressed Pressure in the annual game with the Army, and never did better than to secure a narrow margin of victory.

West Point has always been known as the annual game with the Army, and never did better than to secure a narrow margin of victory. The game was played on the 19th of September, and the result was a narrow margin of victory for the Army. The game was played on the 19th of September, and the result was a narrow margin of victory for the Army.

Harvard Gets Drop Kick.

Then, with only two minutes to spare, Harvard tried what has been known as a drop kick. The ball was kicked from the line of scrimmage, and the result was a narrow margin of victory for the Army. The game was played on the 19th of September, and the result was a narrow margin of victory for the Army.

Harvard Coaches Say It Will Work Great Injury to Football Game.

The coaches of the Harvard team, who were present at the game, expressed their opinion that the drop kick was a dangerous and unsportsmanlike act. They felt that it was a violation of the rules of the game, and they hoped that the authorities would take steps to prevent such a thing from happening again.

BOY DRIVEN MAD IN ATTEMPT TO MAKE SCHOOL TEAM

Wild Run Through Streets Is Blocked by Member of Own Football Squad.

DIVERTED from his desire to realize his dream of making the football team of the Boston High School, a young man, who had been driven mad by the desire to make his place on the team, yesterday, Sunday, October 31, 1909, in a driving rain, ran through the streets of Boston, and was blocked by a member of his own football squad.

Runs Down Policeman. The first appearance of the madly driven boy was at the corner of the North and South streets, where, after attempting to break through the crowd, he was blocked by a policeman. The boy, who was dressed in a dark suit, and who had a wild, desperate look, ran through the crowd, and was blocked by a member of his own football squad. The boy, who was dressed in a dark suit, and who had a wild, desperate look, ran through the crowd, and was blocked by a member of his own football squad.

Heid in Padded Cell. A number of boys of about twenty of the Boston High School, who were in the crowd, were also driven mad by the desire to make the football team. They were also driven mad by the desire to make the football team. They were also driven mad by the desire to make the football team.

SMITH'S NEW BOY—NO. 14
By HERBERT KAUFMAN

SMITH has a new boy at work tomorrow morning—a boy whose school days are over and whose play time is past—a boy who must have been plucked from recreation and instruction before his body or his brain could ripen—a child setting out to do battle against the world with a broken sword—WITH HALF AN EDUCATION.

Lack of training is more serious today than in Smith's youth. The average of information was lower then. The academy was the end, not the beginning, of most ambitions.

But what with high schools and colleges and universities pouring their thousands of graduates into the world and forest by the pressure of competition in every field to accept wages instead of income, it doesn't seem at all AN IGNORANT CHILD will stand much of a show for advancement.

He isn't fit for the fight—he isn't fed for it or trained for it—he hasn't long or strong weapons.

Poor food and poor clothing will discount his strength and his health all through his growing years. He'll starve for physical and mental nutrition. He won't be tempered to his tasks. And so they'll soon wear him down and GRIND HIM INTO HELPLESSNESS.

He will learn of the vicious and ugly side of existence before he has acquired the judgment to realize their danger. He will see things and learn things NEVER MEANT for the eyes and ears of childhood.

But Smith won't stop to think about such matters. He's practical; he knows his heart at home. It only works after hours and on Sundays. He can't afford to use it in his business—it doesn't earn dividends; it isn't a producer; it's a bad motive power; its throbs are wasteful and lead to extravagance, which doesn't look well on the balance sheet.

Something he will learn that success unswerving by kindness and humanity is spelt with bitterness.

Of course YOU'RE not like Smith. YOU know all about the children in your employ. When the frosts are sharp in the morning or the children freeze shivering down or the snows are on the streets, YOU make sure that the little chaps who run your errands or drive YOUR wagons are well clad.

You know that there's poverty in their homes, and as you think of your own youngsters, and you contrast their lot with the boys who must scowl and sulk at day's end down to their father's office or the factory, for signs of thankfulness goes through you and in gratitude to Providence many a time you have gone to the cash box to even things up a bit. You know all about them—about the sickness in their tenements—the struggles of their mothers—and when food is low at home—when there's no waiting to be served, you slip an extra dollar into the pay envelope, and ADD A CREDIT to the Book of Life.

That is, if you aren't Smith.

And if you aren't Smith you will help the Y. M. C. A. help Smith's boy and other boys and young men in their great city. Tomorrow is the LAST DAY you can help raise that \$500,000. WILL YOU?

Best copies of the AMERICAN containing the articles by Mr. Kaufman may be obtained at the AMERICAN office.

SCHENCK WEDDING DELAYED BY CHURCH

POLICE SEE MAN BEATEN IN STREET

NEW YORK, Oct. 30.—Mr. Nathan Schenck, of the New York City Police Department, was married yesterday.

These were only a few persons present for the wedding ceremony.

In addition to the bride's mother, Mrs. Schenck, the bride's father, Mr. Schenck, and the bride's brother, Mr. Schenck, were present.

The ceremony was performed by the Rev. Dr. Schenck, of the New York City Police Department.

From the church they drove to the Hotel Sayer, where Mr. Schenck had an apartment.

After the wedding ceremony, the bride and groom were taken to the Hotel Sayer.

The bride's father, Mr. Schenck, and the bride's brother, Mr. Schenck, were present.

\$37,661 IS NEEDED YET BY Y. M. C. A. YOU CAN HELP?

Col. Gaston Appeals to Boston Citizens to Provide Sum Necessary for New Home.

To the Citizens of Boston:

Our efforts towards raising a building fund for the Young Men's Christian Association have up to date met with most gratifying success. The public has responded to our appeals splendidly, but there are still some \$37,661 yet to be raised before Monday night. With a single exception in no day of our campaign has that sum been collected. We must, therefore, again appeal to our fellow citizens for their contributions. Do not think we have already completed our task and that no further sums of money are needed. They are especially wanted now as there is but one day more left in which to raise the amount necessary to hold large terms that have been subscribed conditionally upon raising the full \$500,000. This is the last chance to assist us and the cause we represent. I send contributions to the undersigned or to any member of the committee.

WILLIAM A. GASTON, Chairman, Citizens' Committee, Shawmut Bank Building, Boston, Mass.

Amount needed \$37,661

Related to date \$402,339

Amount still needed \$37,661

Y. M. C. A. Building for Boston will become a reality. If today and tomorrow the people take hold as they have been doing in the past, the building will be completed by the end of the year.

Every dollar that is contributed to the building fund will be given a chance to express itself.

In the hands of the Secretary George W. Schaffer, there is no need to say more. The building fund is a reality. It is a reality. It is a reality.

THE LAST DAYS OF GREAT SALE LAST DAYS

The Week of Nov. 2

ANNIVERSARY WEEK

AT THE

CONTINENTAL

November 2, 1888—November 2, 1909

21 Years of Success Anniversary sale ends Saturday night. This week, great bargains—this week ends our most successful sale. A wonderful October's business. The biggest October's business in our 36 years' record as retailers. Come early in the day when possible. Sale positively ends Saturday night.

November 2, 1888—21 Years—November 2, 1909

1809 to 1888, Boylston Market 1888 to 1909, The Continental

This Week Several styles of new heavy weight dark colored worsted suits in the new shades. Fine dark stripes, nicely trimmed and cut on the newest models.

8.75

This Week Several hundred good style dark colored worsted suits, many shades of the new olives and modes and dark mixtures. These suits were manufactured to sell at \$15. We say right here—you can buy one, and if you can match it for less than fifteen dollars return it and get your money. Every suit a new one, cut on the latest models and sold to advertise

10.00

This Week—Five styles of \$15 and \$15.50 new fall worsteds—about two hundred in the lot. Some are hand tailored, and all are on the newest models. Our Anniversary Sale will cause a sensation. These suits are...

Again and again we are told that this is the busiest Store—and often that it is the Best Store. Its business is obvious to those who come here and look about. And business in these days of sensible discrimination, means a measure of excellence. It is fairly safe to follow the crowds. Those who come here tomorrow will not fail to find a vast array of merchandise that cannot be duplicated outside this Store at any price. A full money's worth all over the Store—and often a better money's worth than can generally be found.

Where You Can Find 32 Styles of Fall Coats at 25.00

That's one good reason why more people are likely to buy coats at Filene's than elsewhere this week.

And what we do at 25.00 in size of stock, in variety of styles, colors and materials, we do at 15.00, 18.50 and 55.00. Perhaps you saw the window display of beautiful evening wraps last week. On view in the department this week.

Here are three of the thirty-two styles from which you can select at 25.00:

New long semi-fitted plush and caracul cloth coats; they have shawl collars and big metal buttons; the linings are of yarn-dyed satin.

New broad-loth street coats, with velvet shawl collars and silk ornaments; Skinner satin lined, also interlined.

New evening or street coats, of broad-loth, interlined and peau de cygne lined; black, navy, light blue, russet, peach, champagne, gray, tan and brown.

The Time to Strike Is Now, Mr. Voter

Bare Existence or Good Living—Near Poverty or Assured Plenty—an Empty Breadbox or a Savings Bank Balance—These Are the Issues on Which You Must Cast Your Vote on Tuesday.

For the moment, old party lines must fade—old party labels do not count—old party allegiances cannot be remembered.

There is a problem that is bigger and broader—harder and nearer—a problem which is striking you and yours—a problem lying on the shelves of your pantry and hanging on the hooks of your wardrobe—a problem carried in the dinner pail and present at the lunch table and worn upon your back—a problem which blots out the distinction which once marked Democrat and Republican—which calls upon them to join hands and join hearts and join cause in common defence against a common outrage.

Let others explain to you the technicalities of less pressing reforms and bring to bear their statistics upon more distant questions. To-day I have neither words nor thoughts for their consideration. A nearer and dearer and clearer issue stands in the foreground.

HOW MUCH LONGER CAN THE AVERAGE MAN ENDURE A CONSTANT RISE IN THE COST OF EVERY NECESSITY OF LIFE WITHOUT A CORRESPONDING INCREASE IN HIS INCOME OR HIS WAGES?

How much longer can he stand the strain of the criminal tariff without breaking under its burden?

How much longer can his share in the production of the wealth of the nation be minimized by a set of selfish industrialists who have by their control of the Republican party divided our citizens into two distinct classes—the plundering few and the blundering many?

The new tariff law means a higher cost of food, higher cost of clothing with its poorer materials, a smaller loaf of bread. It means days and nights of worry to every father and every mother as they plan together how to meet these increased prices on the same weekly pay.

It means a tariff warfare with our best customers. It means the checking of our export trade, thus lessening the opportunity for steady employment of labor.

It has legitimized a daily hold-up—every twenty-four hours every man and woman in every walk of life—the pitiful little cash girl as well as the sturdy mill worker—the office boy as well as the business man—are through its workings forced to stand and deliver their pennies, dimes and dollars to the bread taxers.

It is an issue which concerns every family in every community—it snatches from the purse of the washerwoman as well as the check book of the merchant.

It adds to the cost of the food you eat, the clothes you wear, and homes you rent.

Brought face to face with such a vital and vicious imposition as this, the ties of party are not to be preferred to the needs and comfort of the home. Further support of a party that has refused to keep its pledges is impossible until that party, smarting under the sting of public rebuke by the people, changes front and makes an honest endeavor to keep its faith with the people. Better for that party a temporary defeat in Massachusetts this year than an overwhelming defeat in the Congressional election next Fall.

We call for the support of all citizens rather than of Republicans and Democrats.

This is the hour to strike for your rights,—this is your chance to rebuke the men whom you elected to serve you and who have dared to betray your trust to their Trusts.

You cannot hesitate—time will not wait. Another week and all your protests must be futile until another election.

Throughout the land there is sounding a low but furious murmur from eighty millions of people whose anger is swelling and welling and will soon be telling against a party which has sold its supporters to organized greed.

We stand for the spirit of right—for the right to existence. We stand for the broad principle in defence of which this State in an older day gladly gave its sons and its fathers and its husbands—for liberty—not the name, but the deed.

We do not know how far we can avail against an organization entrenched behind a wall planned for the defence of the people, but now turned into a fence to hold them fast in economic slavery. But if we shall be called upon to serve our State, we pledge our every hour and every energy to a constant battle against the men who have perpetrated THE OUTRAGE OF 1909, and I have faith enough to believe that our citizens of all parties will take the first and only method open to them to express their protest in a way that cannot be misunderstood or misrepresented, and use the ballot, their sole weapon, to demand that the pledges made to them last year of a reduction on the necessities of life be kept. The incoming Congress can grant this relief, will grant it if the voters of Massachusetts do their part next Tuesday at the polls. If you do not prefer party to the welfare of those near and dear to you who properly look to you to provide the comforts and the necessities of life, your place is by my side, working and voting for your family and your home.

EUGENE N. FOSS,
Candidate for Lieutenant-Governor.

How Long Are YOU Going to Stand for This?

For the fact too well known to you that an all wool suit that could be purchased for \$15 now costs \$20 and instead of all wool it is only shoddy. Flour that five years ago cost you \$5.80 a barrel now costs \$7.25. Roast beef that formerly was 15 cents now is 28 cents. Veal hindquarters have gone from 13 to 22 cents. Pork has jumped from 10 to 16 cents, smoked hams from 13 to 20 cents, corned shoulder hams from 9 to 14, sausages from 11 to 15 cents, lard from 8 to 18 cents. Butter that formerly cost 25 cents a pound is now around 40. Milk was 5 and 3 cents a quart, now it is 7, 8 and 9. Shirting that formerly cost 8 cents is now 15. Brown sheeting was 8 and is now 27. Bleached sheeting was 9 and now it's 30; ticking was 11, and 16 is its price now.

And yet Senator Lodge says, "Let the tariff alone." If you wish to repudiate Mr. Lodge and register the voice of Massachusetts against this obnoxious tariff that he has been instrumental in creating.

Vote For JAMES H. VAHEY for Governor
EUGENE N. FOSS for Lieutenant-Governor

A Vote for Pelletier Is a Vote for a People's District Attorney!

Our laws are designed to give **THE SQUARE DEAL** to rich and poor alike. They should be so administered and will be so administered in Suffolk County when Pelletier is District Attorney.

Pelletier believes in the **OPEN DOOR** for the District Attorney's office.

The law should be a protection for the oppressed and deserving; a punishment for the vicious and deliberate law-breaker. No cheating finger shall press down the scales of justice.

Justice becomes a farce when the **RICH AND POWERFUL** plunder and **GO UNPUNISHED**, while the poor and lowly suffer the full penalty of the law.

Misfortune is not crime. Pelletier can distinguish one from the other. Pelletier stands for the square deal. Pelletier promises to prosecute not persecute.

Pelletier stands for **HOME RULE** as against **BOSS RULE**.

THE VOTES OF THE PEOPLE, not the dictation of Boss Lodge, will name the District Attorney—who will administer the important duties of this all important office. Lodge named Hill. Let the people's voice **RING OUT FOR PELLETIER**.

William A. Gaston says:

(Gaston, Snow & Saltonstall.)

I shall take pleasure in voting for you for District Attorney of Suffolk County at the next election.

George C. Dickson says:

(Dickson & Knowles.)

Your fitness for the position of District Attorney is unquestioned upon all sides. The position belongs to you for your own worth and as the candidate of the Democratic party. Am glad to join with your many friends at the Bar and in other walks of life endorsing your candidacy.

Thomas W. Proctor says:

(Proctor & Proctor.)

I earnestly hope that Mr. Pelletier will be elected to the office of District Attorney. I am satisfied that he would fill the office very acceptably.

Patrick M. Keating says:

(Keating & Brechett.)

I believe you should be and will be elected District Attorney, because you are of upright character, and that you are more familiar with the way in which the people of Suffolk County live than your opponent.

Frank Leveroni says:

(Judge of Juvenile Court.)

I heartily recommend your candidacy for election to the office of District Attorney, and would advise all voters of Suffolk County to cast their ballot for you. Your integrity and honesty commend you for the office. You represent the sentiments, characteristics, and ideals of the majority of the voters of the County of Suffolk.

A. C. Webber says:

You possess all the qualifications necessary for the office of District Attorney and you will give the people of Suffolk County an efficient, broad-minded, impartial and humane administration of the duties of the office.

James H. Wolff says:

Justice and equal representation for all demand your election.

James E. Cotter says:

If elected to the office of District Attorney you will, in my judgment, deal honorably and justly with all persons who have occasion to transact business with that office.

John H. Casey says:

(Ex-Asst. U. S. District Attorney.)

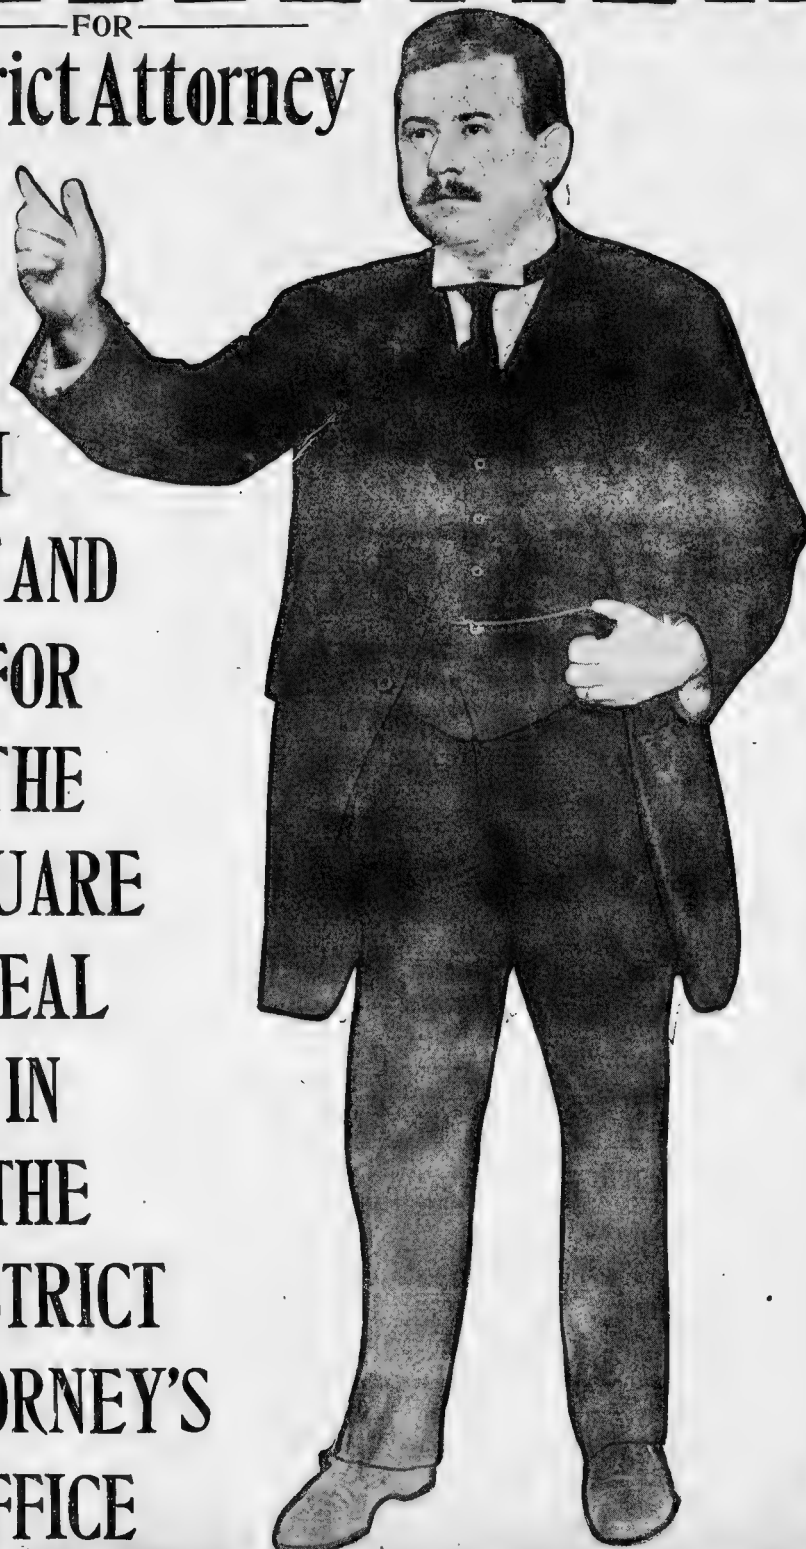

Mr. Pelletier is an able lawyer, an honest man, and of the highest character. These qualities dictated his nomination; and the people should elect him.

PELLETIER

ATTORNEY'S
OFFICE

JOSEPH C. PELLETIER, 4 Haverland St., Boston.

"BOSTON SCHOOLS BEHIND TIMES"

A. E. Winslow Would Have Workbench and Sewing Machine in Rooms.

Boston schools are really behind the times, and the time has come when they must be brought up to date. This is the opinion of A. E. Winslow, president of the State Board of Education, who in a recent address before the Teachers' Association of the city, said that the schools of Boston were "behind the times" in many respects. He pointed out that the schools were not equipped with the latest methods of teaching, and that the teachers were not given the necessary training and support. He called for a complete reorganization of the school system, including the introduction of modern teaching methods and the improvement of the teachers' salaries and working conditions. He also emphasized the importance of vocational training and the need for schools to prepare students for the demands of the modern world.

RUSSELL ELUDED SLEUTHS BY RUSE

Claimant to \$250,000 Made Pursuers Think He Was Sick and Fled in Auto.

James Russell, who has been making a name for himself as a claimant to a large sum of money, has been eluding the efforts of the police and the press. He has been making a series of statements that have led to the belief that he is a man of great wealth and influence. However, his true identity and the source of his claims remain a mystery. He has been seen in various parts of the city, and his movements are being closely watched by the police. He has also been seen in the company of several individuals who are believed to be part of a criminal organization. The police are determined to track him down and uncover the truth about his claims.

OPERATION UPON A WOMAN OF 103

Remarkable Surgical Feat Is Second to Be Performed Since Passing 100.

The most remarkable operation known to the history of surgery has been performed upon a woman who is now 103 years of age. The operation, which was performed by a team of surgeons, was a major abdominal surgery. The patient, who has been in excellent health for many years, had been suffering from a long-standing condition that required surgical intervention. The surgeons were able to perform the operation successfully, and the patient is now recovering well. This is the second major operation performed on a woman of this age, and it is a testament to the skill and expertise of the medical profession.

WOMAN'S LETTER IS ALLOWED AS WILL

Disposes of Property in Affectionate Note to Nearest Friend.

A letter written by a woman who had been suffering from a long illness, was allowed to be read at her funeral. The letter, which was addressed to her nearest friend, was a touching and affectionate note that disposed of her property and expressed her wishes. The letter was read aloud by the friend, and it was a source of great comfort to the family. The woman, who had been a devoted and loving person, had suffered from a long and painful illness, but she had remained strong and dignified throughout. Her letter was a testament to her character and her love for her friends and family.

NATIONAL OFFICERS OF THE SHOEMEN'S UNION

Has Achieved Much for Peace in Labor Strife; Has Vast Resources.

The National Officers of the Shoemen's Union, who have been elected to their positions for the coming year, have a record of achievement in promoting peace in the labor movement. They have been successful in negotiating several major labor agreements, and they have been instrumental in resolving many labor disputes. The union has vast resources, and it is well-equipped to handle any challenges that may arise. The officers are committed to the principles of fairness and justice, and they are dedicated to the interests of the shoemen. They will continue to work for the betterment of the labor movement and the promotion of peace in the workplace.

SHOE WORKERS LEAD UNIONS OF NATIONS

Has Achieved Much for Peace in Labor Strife; Has Vast Resources.

The shoe workers, who are the leading union in the world, have achieved much for peace in the labor movement. They have been successful in negotiating several major labor agreements, and they have been instrumental in resolving many labor disputes. The union has vast resources, and it is well-equipped to handle any challenges that may arise. The workers are committed to the principles of fairness and justice, and they are dedicated to the interests of the labor movement. They will continue to work for the betterment of the labor movement and the promotion of peace in the workplace.

FREE PILE CURE

Sent to Demonstrate the Merits of Pyramid Pile Cure.

What It Has Done for Others, It Can Do for You. We have testimonials from the hundreds of men and women who have been cured of piles. The cure is simple, effective, and free. It is a true miracle cure that has helped thousands of people. If you are suffering from piles, you should try this cure immediately. It will save you a great deal of pain and expense. The cure is available to everyone, and it is a true gift to the world. Send for your free copy today.

READ THE TRUTH ABOUT THE TARIFF

Do Not be Misled by the Misstatements and Untrue Assertions Which are Being Made by Democratic Speakers and Spread Broadcast Through Advertisements in the Newspapers. The Present Campaign is for the Election of State Officers. No National Issues are Involved, and Yet the Democratic Party, Which Today is Following the same Policy of Obstruction as in Former Years, is Endeavoring to Befog the Real Issues by Specious and Misleading Arguments as to the Effect of the New Tariff Law Upon the Price of the Necessaries of Life.

In recent advertisements and in speeches the democratic party is endeavoring to deceive the people as to the real reasons for the advance in prices. Arguments are advanced which are intended to injure the republican party by the bold assertion that the present high cost of living is caused by the new tariff bill. These assertions are untrue and those who make them should know them to be untrue.

The democrats say that the following articles have been increased in price on account of the tariff, but, as a matter of absolute fact, the tariff has not been increased upon any one of them. In many cases the tariff has been reduced.

Read the following list of articles named by the democrats and other items the tariff of which has been reduced and decide for yourselves if the tariff is responsible for the prevailing high prices.

- FLOUR.....Tariff not changed.
- BEANS.....Tariff not changed.
- CORNFLOUR.....Tariff reduced.
- BEEF.....Tariff reduced 25%.
- VEAL.....Tariff reduced 25%.
- PORK.....Tariff reduced 25%.
- BACON AND HAM.....Tariff reduced 20%.
- LARD.....Tariff reduced 25%.
- CABBAGE.....Tariff reduced 33 1/3%.
- BUTTER.....Tariff unchanged on all dairy products.
- MILK.....No duty on anthracite coal. Tariff reduced 33% on bituminous or soft coal.
- WOOD and manufactures of Wood.....Tariff greatly reduced.
- BOOTS and SHOES.....Tariff reduced 60%.
- COTTON GOODS.....Tariff not changed except in certain finer grades which are luxuries. Raw cotton has always been on the free list. The increase in price to the consumer is due to the higher price of raw cotton, the higher rate of wages paid and the shortening of the hours of labor.
- WOOLENS.....Tariff unchanged except in unimportant details.

- HARNESSES and SADDLES.....Reduced 55%.
- AGRICULTURAL IMPLEMENTS.....Reduced 25%.
- PETROLEUM OIL and PROD.....Placed on Free List.
- UCTS.....Reduced 20 to 48%.
- VARNISHES.....Reduced 20 to 48%.
- WINDOW GLASS, common.....Reduced 4 to 20%.
- BAR IRON.....Reduced 25 to 50%.
- BEAMS and BUILDING GIRDS.....Reduced 20 to 40%.
- ERS.....Reduced 20 to 40%.
- BARBED WIRE, for fences.....Reduced 37%.
- KNIVES and FORKS, commonly used.....Reduced 13 to 26%.

These are only a few of the HUNDREDS of ITEMS in daily use by the people, the duty on which has been reduced under the new tariff.

Read This Statement by the Treasury Department as to the Increases and Decreases in the New Tariff Bill:

- NUMBER OF INCREASES.....220
- NUMBER OF DECREASES.....654
- NUMBER OF ITEMS UNCHANGED.....1150
- INCREASED.....\$210,852,525
- DECREASED.....\$1,951,813,175

Does This Showing Indicate That the New Tariff Bill is Responsible for the Increases in Prices?

RAW MATERIALS. Under the new tariff bill hides have been placed on the free list. Timber has been reduced 50 per cent. Lumber has been reduced from 20 to 50 per cent; bituminous coal has been reduced 25 per cent; iron ore has been reduced 62 1/2 per cent; pig iron has been reduced 75 per cent; petroleum and all its products have been put on the free list.

President Taft says: "I have signed the Payne tariff bill because I believe it to be the result of a sincere effort on the part of the republican party to make a downward revision."

Congressman McCall, who was the Massachusetts member of the conference committee on the Payne tariff bill, says: "It represents the greatest reduction that has been made in the tariff at any single time since our first revenue law signed by George Washington."

Everybody knows that the prices of the necessities of life have increased, but they have increased in Europe faster than in the United States. If this is not so, why is it that there are over one million emigrants coming to this country each year?

The true reason for the increase in prices is due to the fact that the United States is not producing the necessities of life to keep pace with its increased population.

To this and not to the tariff is due the increased cost of living.

Do not permit the democratic party to fool you in a desperate effort to elect its candidates for governor and lieutenant governor.

The election of a democratic governor or lieutenant governor will not have the slightest influence in determining a question relating to the tariff.

They ask you to register a protest against the tariff by voting for a democrat as a state officer. This argument is as senseless as the many other false issues which they seek to bring into this campaign.

Repudiate such chicanery and rebuke those who attempt to deceive you, by voting for Draper and Frothingham. These faithful public servants deserve re-election at your hands. Governor Draper has given the Commonwealth a clean, business administration. He has maintained the high standard established by his predecessors. He has been true to the best traditions of Massachusetts. Louis A. Frothingham has faithfully served you as lieutenant governor with dignity and ability.

GRANT WINNER VANDERBILT CUP RACE

Boston Pilot Drives His Machine to Victory Ahead of Two Leaders.

By J. C. KERRISON.
NEW YORK, Oct. 20.—The premier prize of the season of the year was captured by two clever Boston drivers today. Here, first, at the wheel of the six cylinder auto, won the Vanderbilt cup, and the second prize was won by the same driver, who was also the winner of the Vanderbilt cup. The race was a most interesting one, and the drivers were all well known to the spectators. The race was held at the Vanderbilt estate, and the drivers were all well known to the spectators. The race was held at the Vanderbilt estate, and the drivers were all well known to the spectators.

Management is Criticized.
There was apparently little attention to detail, and the general handling of the race but little consideration to the fact that the race was a most interesting one, and the drivers were all well known to the spectators. The race was held at the Vanderbilt estate, and the drivers were all well known to the spectators.

Times Neglect Work.
This of course gave him the race. Other than that, the matter was as plain as a rail. The management of the race was a most interesting one, and the drivers were all well known to the spectators. The race was held at the Vanderbilt estate, and the drivers were all well known to the spectators.

Matson Scores New Victory.
In the winner of the Massachusetts state race, Joe Matson scored his second big win of the year. He started to drive his new car, and the race was a most interesting one, and the drivers were all well known to the spectators. The race was held at the Vanderbilt estate, and the drivers were all well known to the spectators.

Amateur's Fast Work.
When the amateur driver of the first race on the very first day of the season, he showed that he was a most interesting one, and the drivers were all well known to the spectators. The race was held at the Vanderbilt estate, and the drivers were all well known to the spectators.

BROOKLINE FELL DOWN.
St. John's Prep. Worked Forward Pass Perfectly.

While over a thousand of its most loyal supporters were present, the Brookline football team fell down before the first half of the game. The team was defeated by St. John's Prep, who worked forward pass perfectly. The game was held at the Brookline stadium, and the spectators were all well known to the players.

FIELD GOALS FOR EVERETT HIGH

Captain Brickley Kicks One from Placement and Drops Another, Beating Malden.

By J. D. DELANEY.

Captain Brickley's good kick was the direct cause of the Everett high school team doing the unexpected, and defeating Malden high school by a score of 6 to 0 in the annual battle between the two teams in a suburban league contest at the new Everett high school grounds yesterday afternoon.

Early in the first half Captain Brickley stood on the 30-yard line and with his younger brother George holding the ball, kicked a goal from placement, setting the team three points. The kick was perfect, and was sent over with a drive and carry that would have been a fine one for the 30-yard line. In the second half, Captain Brickley kicked a goal from placement, setting the team three points. The kick was perfect, and was sent over with a drive and carry that would have been a fine one for the 30-yard line. In the second half, Captain Brickley kicked a goal from placement, setting the team three points. The kick was perfect, and was sent over with a drive and carry that would have been a fine one for the 30-yard line.

WALTHAM TRIMS PORTLAND ELEVEN

Maine School Boys, Not Having Speed of Visitors, Told the Story.

By J. D. DELANEY.

Portland, Me., Oct. 30.—Portland high went down to defeat before Waltham High of Massachusetts after a hard game played here today last 17 to 0. The big crowd that had gathered at the game in Portland was on hand, and Waltham speed told the story. Putting to make distance consistently through the line, Waltham scored three touchdowns and a field goal, while Portland scored only one touchdown. In the second half, holding the visitors without a score in the last seventeen minutes of play.

HOLY CROSS EASY FOR DARTMOUTH

Hanover Team Mostly Made Up of Second String Men, but Win, 12 to 0.

By J. D. DELANEY.

HANOVER, N. H., Oct. 30.—With a team chiefly composed of second string men, Dartmouth won from Holy Cross by a score of 12 to 0, in a game made spectacular by numerous long runs of the Dartmouth backfield.

Holy Cross made first down but did not get the center, and but for the wonderful blocking of their line, when they stepped back was reached, the Green would have scored three more touchdowns. Dartmouth failed in three attempts at field goals.

COSTLY FUMBLE BY TUFTS LOST GAME

Springfield Snatches Victory in Last Few Minutes of Play at Medford.

By J. D. DELANEY.

Springfield Training School won from Tufts by winning a costly fumble and running 33 yards for a touchdown in the last few minutes, after the score was 2 to 0 in Tufts' favor. The Medford team always had the upper hand over the visiting boys, as Springfield never got nearer than Tufts' 30-yard line, while in the last half Tufts was on their 60-yard line but failed to put over.

Tufts' score was in the first part of the first half, when they tried their speed game, and was by straight line punting and a field goal.

The game was carried by frequent punting by both sides. Tufts led 2 to 0 at the end of the first half. Springfield scored in the second half by a fumble. The fumble was made by a player on the Springfield team, who was running with the ball. The fumble was picked up by a player on the Springfield team, who ran 33 yards for a touchdown.

COLBY WINS FROM BOWDOIN 12 TO 5

Hard Fought Game in the Maine Football Championship Series.

By J. D. DELANEY.

WATERVILLE, Me., Oct. 30.—Colby won her second game in the Maine football championship series by defeating Bowdoin by a score of 12 to 5. Colby gained through Bowdoin's line at will in the first half, but Colby was penalized time and again for holding in the line, and lost by a narrow margin in the second half.

Colby kept the ball in her opponent's territory during the half, and following a run of several yards by Roy Good, broke through Bowdoin's line at will in the second half. Bowdoin scored a touchdown in the second half, but Colby's victory was sealed by a field goal in the last few minutes of play.

YALE 1918 DEFEATS ANDOVER BY POINT

Each Side Scores Touchdown, but Fletcher Fails to Kick Goal.

By J. D. DELANEY.

NEW HAVEN, Oct. 30.—Andover Academy barely lost the game to the Yale Freshmen today 6 to 5. The match was played in a perfect game. Each side scored a touchdown, but Fletcher failed to kick a goal. Fletcher scored the touchdown in the second half, but Yale scored a touchdown in the first half, and the game was tied 5 to 5. In the second half, Fletcher scored the touchdown, but Yale scored a touchdown in the first half, and the game was tied 5 to 5.

NAVY HOLDS TIGERS TO CLOSE SCORE

Princeton Barely Able to Win, the Score Ending 5 to 3.

By J. D. DELANEY.

ANNAPOLIS, Md., Oct. 30.—Though showing much more power in offense than the midshipmen, Princeton was barely able to win against the Naval Academy this afternoon, the score being 5 to 3. The midshipmen made four more first downs than the visitors, but Princeton's defense held them to a close score. Princeton scored a touchdown in the second half, but the Naval Academy scored a touchdown in the first half, and the game was tied 3 to 3. In the second half, Princeton scored the touchdown, but the Naval Academy scored a touchdown in the first half, and the game was tied 3 to 3.

BRICKLEY'S GREAT KICKING

Captain Brickley's goal from placement proved one of the most effective in the football this season, for it was made during the wind, and being scored from a distance of 30 yards, it was a fine one. The kick was perfect, and was sent over with a drive and carry that would have been a fine one for the 30-yard line. In the second half, Captain Brickley kicked a goal from placement, setting the team three points. The kick was perfect, and was sent over with a drive and carry that would have been a fine one for the 30-yard line.

BROWN TAKES SLOW GAME FROM AGGIES

Scherhorn Drops a Pretty Goal from the Thirty-five Yard Mark.

By J. D. DELANEY.

Providence, Oct. 30.—In a rather slow and unexciting game, Brown won from Agassiz by a score of 12 to 0. Brown's defense was excellent, and Agassiz's offense was slow. Brown scored a touchdown in the second half, and Agassiz scored a touchdown in the first half. The game was tied 6 to 6 at the end of the first half. In the second half, Brown scored the touchdown, and Agassiz scored a touchdown in the first half, and the game was tied 6 to 6.

STATE COLLEGE WINS

Bates Shows Strength in First Half, but is Finally Outclassed.

By J. D. DELANEY.

State College, Oct. 30.—Bates won from State College by a score of 12 to 0. Bates' defense was excellent, and State College's offense was slow. Bates scored a touchdown in the second half, and State College scored a touchdown in the first half. The game was tied 6 to 6 at the end of the first half. In the second half, Bates scored the touchdown, and State College scored a touchdown in the first half, and the game was tied 6 to 6.

USE 'SUBS' AND WIN

Chelsea High Without Four Veterans, But Easily Land Victory.

By J. D. DELANEY.

Chelsea High, Oct. 30.—Chelsea High won from Chelsea High by a score of 12 to 0. Chelsea High's defense was excellent, and Chelsea High's offense was slow. Chelsea High scored a touchdown in the second half, and Chelsea High scored a touchdown in the first half. The game was tied 6 to 6 at the end of the first half. In the second half, Chelsea High scored the touchdown, and Chelsea High scored a touchdown in the first half, and the game was tied 6 to 6.

CLOSE FOR MILTON

Defeats Melrose High by a Score of 6 to 5.

By J. D. DELANEY.

Milton, Oct. 30.—Milton won from Melrose High by a score of 6 to 5. Milton's defense was excellent, and Melrose High's offense was slow. Milton scored a touchdown in the second half, and Melrose High scored a touchdown in the first half. The game was tied 3 to 3 at the end of the first half. In the second half, Milton scored the touchdown, and Melrose High scored a touchdown in the first half, and the game was tied 3 to 3.

FOUR SOCCER TEAM WINS

River Players Defeat Weymouth Eleven Easily, 3 to 1.

By J. D. DELANEY.

River, Oct. 30.—River won from Weymouth by a score of 3 to 1. River's defense was excellent, and Weymouth's offense was slow. River scored a touchdown in the second half, and Weymouth scored a touchdown in the first half. The game was tied 1 to 1 at the end of the first half. In the second half, River scored the touchdown, and Weymouth scored a touchdown in the first half, and the game was tied 1 to 1.

East Boston Defeated

East Boston defeated East Boston High by a score of 12 to 0. East Boston's defense was excellent, and East Boston High's offense was slow. East Boston scored a touchdown in the second half, and East Boston High scored a touchdown in the first half. The game was tied 6 to 6 at the end of the first half. In the second half, East Boston scored the touchdown, and East Boston High scored a touchdown in the first half, and the game was tied 6 to 6.

NEWTON 6; WORCESTER 3

At Newton yesterday the Newton High team beat the Worcester High team by a score of 6 to 3. Newton's defense was excellent, and Worcester High's offense was slow. Newton scored a touchdown in the second half, and Worcester High scored a touchdown in the first half. The game was tied 3 to 3 at the end of the first half. In the second half, Newton scored the touchdown, and Worcester High scored a touchdown in the first half, and the game was tied 3 to 3.

DORCHESTER HEIGHTS WON

Dorchester Heights defeated the strong Weymouth team by a score of 12 to 0. Dorchester Heights' defense was excellent, and Weymouth's offense was slow. Dorchester Heights scored a touchdown in the second half, and Weymouth scored a touchdown in the first half. The game was tied 6 to 6 at the end of the first half. In the second half, Dorchester Heights scored the touchdown, and Weymouth scored a touchdown in the first half, and the game was tied 6 to 6.

DEFEATED HEAVY TEAM

Springfield Downed Amherst High Through Forward Pass.

By J. D. DELANEY.

Springfield, Oct. 30.—Springfield won from Amherst High by a score of 12 to 0. Springfield's defense was excellent, and Amherst High's offense was slow. Springfield scored a touchdown in the second half, and Amherst High scored a touchdown in the first half. The game was tied 6 to 6 at the end of the first half. In the second half, Springfield scored the touchdown, and Amherst High scored a touchdown in the first half, and the game was tied 6 to 6.

Beverly High 5; Haverhill 0

Beverly High defeated Haverhill by a score of 5 to 0. Beverly High's defense was excellent, and Haverhill's offense was slow. Beverly High scored a touchdown in the second half, and Haverhill scored a touchdown in the first half. The game was tied 5 to 5 at the end of the first half. In the second half, Beverly High scored the touchdown, and Haverhill scored a touchdown in the first half, and the game was tied 5 to 5.

Dean Wins 24 to 6

Franklin, Oct. 30.—Dean won from Franklin by a score of 24 to 6. Dean's defense was excellent, and Franklin's offense was slow. Dean scored a touchdown in the second half, and Franklin scored a touchdown in the first half. The game was tied 12 to 12 at the end of the first half. In the second half, Dean scored the touchdown, and Franklin scored a touchdown in the first half, and the game was tied 12 to 12.

So. Boston 22; U. S. S. Vermont 0

POPE RESTRICTS DEBT ON ORDERS

Religious Associations Must Not Assume Obligations Without Approval.

Special Correspondence Boston American.
 ROME, Oct. 26.—The papal decree regarding the debt on orders of religious associations, which was published in the official bulletin of the Holy See, is a decree of the Congregation of the Council, and is not a decree of the Pope himself. It is a decree of the Congregation of the Council, and is not a decree of the Pope himself. It is a decree of the Congregation of the Council, and is not a decree of the Pope himself.

Must First Get Consent.
 The decree states that no religious association, whether it be a confraternity, a sodality, or a similar body, can assume any financial obligation without the express consent of the competent ecclesiastical authority. This authority is the local bishop or the Congregation of the Council in Rome. The decree is intended to protect the financial interests of the Church and to prevent the accumulation of debt by religious bodies.

Requires Vote of Council.
 In addition to the requirement of ecclesiastical approval, the decree also stipulates that any financial decision must be made by a vote of the council or general assembly of the association. This ensures that the members of the association have a say in the financial matters that affect them.

ACTIVE CAMPAIGN.

St. Patrick's Society to Labor for Temperance Cause.

The St. Patrick's Society, which has been active in the temperance cause for many years, is now launching a new campaign. The society plans to hold a series of public meetings and lectures throughout the city, with the aim of raising public awareness of the dangers of alcohol and promoting the benefits of temperance.

Rev. Mother Visits Boston.

Rev. Mother Superior of the Sisters of the Holy Family, who is visiting Boston for the first time, is expected to arrive in the city tomorrow. She will be accompanied by a small party of sisters and will spend several days in the city before returning to her convent.

Rev. Supple Promoted.

Rev. Father Supple, who has been serving in the parish of St. Mary's for many years, has been promoted to the position of vicar general of the diocese. This is a significant honor and a recognition of his long and faithful service to the Church.

Underselling

TIMOTHY SMITH CO.

Quality Tells

Price Sells

2249-2281 WASHINGTON STREET, 7-11 VERNON STREET, BOSTON, MASS.—ROXBURY.

ONE MINUTE TO DUDLEY STREET ELEVATED STATION.

And now comes that great Semi-Annual 5 and 10 Cent Sale—This store—crowding event together with the radical price reductions in all sections of the store will surely set a new sales record in our November history. Every counter and shelf, every aisle and floor, from busy basement to the very roof, has ready its bargain bulletin—mighty cash selling trade magnets—that will pull shrewd buyers from all parts of Greater Boston. All in all, the TIMOTHY SMITH CO. is prepared for a record week. Another demonstration of its underselling power—that distinct difference between prices in the downtown high rent districts and prices here—where expense is at a minimum and bargain making at its best.

Here are a few hints of the bargaining in this great semi-annual "5 and 10-cent sale."

SOCIAL BUDGET

THIS week's social budget is a very interesting one, and it is hoped that it will be of interest to our readers. It contains a list of the social events of the week, and a list of the names of the people who are attending them.

Mr. and Mrs. J. M. Smith have given a dinner at the Ritz Hotel. The dinner was given in honor of the birthday of their daughter, Miss Mary Smith. The dinner was a very successful one, and it was enjoyed by all who attended.

I Drank Heavily

Accused young man, with love and devotion, has been sentenced to the State Prison for a term of five years.

NO WIFE FOR ME

THE Nemo SELF-REDUCING IS THE ONLY CORSET THAT EVER HAS OR EVER CAN REDUCE A STOUT FIGURE WITH COMFORT AND SAFETY.

EXTREME SLENDERNESS below the waist; the normal waist-line restored; graceful curves and tapering lines instead of the ultra-straight figure.

THAT'S the Nemo "New American Shape," which has been demonstrated and produced by Nemo Corsets all of this year, but is only now being heralded by corseteers the world over as the "new" and correct thing in corsets.

Nemo Corsets Have Always Led! Nemo Corsets Will Always Lead!

THERE'S a Nemo for every figure. Even slender women are now wearing the famous "Self-Reducing," because it firmly supports the abdomen and internal organs, and therefore produces extreme fashionable slenderness with the utmost comfort and absolute hygienic safety.

Nemo Self-Reducing Corsets \$3.00, \$4.00, \$5.00, \$8.00 and \$10 "The Corset that Never Had a Rival"

Nemo No. 403 is a new model for short-waisted stout women—low bust and under arm; with the new Nemo Relief Bands, which firmly support the abdomen from underneath—\$4.00.

Nemo No. 601 is a model similar to No. 403, but of fine white mercerized brocade; a luxurious corset—\$8.00.

All Nemo Corsets at \$3.00 or more are finished with the new Lastokops Hosiery Supporters, which are guaranteed to outwear any corset.

A FEW ROSES END BACKACHE AND HEADACHES

THE REGULAR DOSE OF DIURETIC

If you take several doses of Pape's Diuretic, all backache and distress from the congested state of your bladder will vanish, and you will feel more energetic.

It cures back, painful stiffness, rheumatism, nervous headache, inflammation, irritability, sleeplessness, dizziness, swollen ankles, swollen sick feeling and other symptoms of sluggish, inflamed kidneys.

Uncontrollable, smarting, frequent urines (even in the night) and all bladder troubles.

This unusual preparation goes at once to the disordered kidneys, cleanses and restores the urinary system and distributes the cleansing action by its vitalizing influence directly upon the organs.

It cures the kidneys, and it cures the rest of the body before you realize it.

The moment you suspect any kidney or urinary disorder or feel rheumatism pain, begin taking this harmless medicine with the knowledge that there is no other remedy at any price that will cure you in the whole world, which will cost so thoroughly and promptly a cure.

Pape's Diuretic, which any druggist can supply.

Only first-class, pure, pharmacist, banknote or any mercantile agency will tell you that Pape's Diuretic is safe.

Climate is a large and responsible factor in the cure of urinary troubles.

Only your conduct thoroughly warrants your confidence.

Only careful results can come from failing Pape's Diuretic, and giving the day's treatment means clean, active kidneys, a healthy bladder and healthy organs—and no backache.

It is the only Pape's Diuretic—first treatment—any drug store or anywhere in the world.

GRAND OPERA HOUSE AND SOLOISTS READY TO OPEN THE SEASON

Demand for Seats Proves So Great That Additional Performances Are Arranged for Thursday Evening.

THE new season opens on Monday night, Monday, November 5, when the Grand Opera House will present the first of its new season of operas. The program for the initial production, "The Mikado," has been arranged with the program of the season in mind. The program for the season is as follows:

Monday, November 5, "The Mikado."
Tuesday, November 6, "The Mikado."
Wednesday, November 7, "The Mikado."
Thursday, November 8, "The Mikado."
Friday, November 9, "The Mikado."
Saturday, November 10, "The Mikado."
Sunday, November 11, "The Mikado."

Spending in Architecture

THOUGH THE new season of operas is now under way, the Grand Opera House is still in the hands of the architect, who is completing the interior of the building. The architect, Mr. J. H. Thompson, is a well-known Boston architect, and his work is being done in a most efficient manner. The building is now in a state of readiness for the opening of the season, and the architect is confident that the new season will be a most successful one.

Illumination Is Grand.

THE new season of operas is now under way, and the Grand Opera House is in a state of readiness for the opening of the season. The architect, Mr. J. H. Thompson, is a well-known Boston architect, and his work is being done in a most efficient manner. The building is now in a state of readiness for the opening of the season, and the architect is confident that the new season will be a most successful one.

RELIGION AND DRAMA

Rev. Mr. Prescott Will Lecture Before Ministers.

"Religion and the Drama," will be the subject of the lecture given by Rev. Mr. Prescott before the ministers of Boston and vicinity at the meeting of the Third Unitarian Society, held at the Grand Opera House, on Monday night, November 5.

Take Off the Fat

Where It Shows

Most women of a certain build find it difficult to get rid of the fat which accumulates on the face, neck, and shoulders. This is due to the fact that the blood is not properly circulated, and the fat accumulates in these places. The only way to get rid of the fat is to use a medicine which will purify the blood and improve the circulation. Such a medicine is "Little Liver Pills," which will not only get rid of the fat, but will also improve the complexion and give the face a healthy, glowing appearance.

MISS BESSIE MCROY AS SHE THINKS SHE LOOKS IN THE 'THREE TWINS'

BESSIE AS THE YAMA YAMA GIRL
HANDY WITH PENCIL

'YAMA YAMA' GIRL HANDY WITH PENCIL

Speaking of Quick Sketch Work, Well, She Can Go Some Herself.

"MISS BESSIE MCROY, of the Boston Theatre, has been making a name for herself as a quick sketch artist. She is a young woman of about twenty years of age, and she is a native of Boston. She has been in the theatre for several years, and she has been making a name for herself as a quick sketch artist. She is a young woman of about twenty years of age, and she is a native of Boston. She has been in the theatre for several years, and she has been making a name for herself as a quick sketch artist.

Add to Performances.

THE new season of operas is now under way, and the Grand Opera House is in a state of readiness for the opening of the season. The architect, Mr. J. H. Thompson, is a well-known Boston architect, and his work is being done in a most efficient manner. The building is now in a state of readiness for the opening of the season, and the architect is confident that the new season will be a most successful one.

GRACE GEORGE IS QUICK TIME STAR

Elevated to Billboard Honors
With Only Two Years' Apprenticeship.

THOUGH GRACE GEORGE is a young woman of only two years' apprenticeship, she has already elevated herself to the position of a quick time star. She is a young woman of about twenty years of age, and she is a native of Boston. She has been in the theatre for only two years, but she has already made a name for herself as a quick time star. She is a young woman of about twenty years of age, and she is a native of Boston. She has been in the theatre for only two years, but she has already made a name for herself as a quick time star.

SAD STORY OF HOW LITTLE ENE GOT OUT

THE sad story of how Little Ene got out of the Grand Opera House is a story of a young woman who was taken advantage of by a man who was a friend of her father. The man was a well-known Boston man, and he was a friend of her father. The man was a well-known Boston man, and he was a friend of her father. The man was a well-known Boston man, and he was a friend of her father.

MISS LOFTUS'S HUSBAND

Domestic Secret Leaks Out Through Box Office Window.

THE domestic secret of Miss Loftus's husband has been leaked out through the box office window of the Grand Opera House. The secret is that Miss Loftus's husband is a well-known Boston man, and he is a friend of her father. The man is a well-known Boston man, and he is a friend of her father. The man is a well-known Boston man, and he is a friend of her father.

CREATING A PAIR FOR BOSTON ENTERPRISE SHOWN BY THE OPERA

Charles Henry Meltzer Shows How Correct Methods Have Been Followed in Plans.

BY CHARLES HENRY MELTZER.
SINCE PAID up to the Boston Theatre, the Boston Theatre has been making a name for itself as a correct method of creating a pair for the Boston Enterprise. The Boston Theatre has been making a name for itself as a correct method of creating a pair for the Boston Enterprise.

FAILURE is seldom ACCIDENTAL

The Man Who Drifts Down the Stream Is Always Given a Chance if He Will Take It.

HIS desire to help others may spring from vanity. It may be born of a smug consciousness of superiority in the successful in life. Whatever its origin, it is a very common human quality, and it serves to throw a few useful barriers across the road to ruin.

In a well-known firm of lawyers was a young man, admitted to the bar, but acting as a clerk till he could get needful experience and accumulate money enough to begin practice for himself.

He was a young man of good ability, who for a year or two did excellent work. His future looked bright. There seemed to be no reason why he would not soon be an important lawyer in an important city, with plenty of business and income enough to make him rich.

Presently he began to drink out of hours and to fool away his time in bad company.

His employers were troubled about it, and sent a fellow clerk to protest against his folly. To this protest, well meant and coming direct from men able to help him, really interested in his success, he paid no attention.

He drank more and more.

When he would disappear for a day or two his employers would send some of his office associates out to hunt for him.

They made it their business to find him, reason with him and, if he was too drunk to take care of himself, to take him to his home or to a hotel and put him to bed.

As time wore on his absences became more frequent.

His employers were long-suffering. They were willing to endure a great deal rather than see this young man make a failure of his life.

They paid him for the time he employed getting drunk, talked and argued with him and tried to make him see what he was doing. His friends cheerfully gave up their time to take care of him when he was drinking. They sacrificed their few hours of leisure in looking after him.

They spent their own money for cab hire to take him home.

All this he took as a matter of course. The drunkard feels that he has a right to be taken care of. He regards it as the duty of his friends to leave everything else and come to his rescue when he is in trouble.

At last his case became so desperate that his employers decided to send him away to a drink cure. This they did, at their own expense, paying his salary while he was gone.

But this young man was determined to fail. He scorned every offer to assist him. He regarded that interest of his friends as impertinent and unwarranted interference with his rights.

When he got back from the drink cure he did good work for a time, and the men who had sent him there congratulated themselves on having rescued him from a dismal fate.

But he soon fell to drinking again. Three or four more efforts were made to save him. Then it gradually dawned upon his friends that these efforts were useless, and finally they desisted.

In a few weeks the man was in the gutter. He got there not because nobody cared, or because the world is against a man who is going down hill, but because he deliberately chose to ignore all the well-meant attempts to bring him back up hill again.

The most hopeful thing about humanity is its desire to be helpful.

Few men are so repellent that they do not have friends, and the man who has friends has no excuse for going wrong.

A man falls in the street, and the nearest person, whether a clergyman or a criminal, will run to help him to his feet again.

His hat is whisked off by a sudden gust of wind, and a dozen other men will scurry after it and bring it back to him.

Let him fall off a street car and receive an injury, and there is never lack of people to run for a doctor, to summon an ambulance or to carry him into the nearest drug store.

Sympathy is automatic when the object of sympathy is in plain sight.

Most men find out very little about the better side of human nature till they fall ill and need help. Then it is that their real friends come to their relief. Money, the hardest of commodities to get, is never spent more freely than in assisting friends who are in trouble.

Most often it is spent by people who can least afford it, always willingly, and with no thought of return.

In an office in New York City was a man who was always unpopular with those who worked beside him. He was sullen, morose and easily offended.

One day the news was brought in that he was dead. His affairs were investigated, and it was found that he had left a wife, two children and no money.

The usual "floral tribute" which had been planned according to custom was dispensed with. Instead of sending his widow useless flowers, every man in the office contributed 10 per cent of his salary that week. Other

offices in the same great organization were notified and the employees asked to contribute.

The day the man was buried his widow was handed a check for two thousand dollars. Now she understands that human nature is not altogether bad.

It is true that the road to folly and ultimate ruin is more attractive than the road to success, but bear in mind that it is always plainly labelled, and that no one takes it with his eyes shut.

Within, conscience and common sense loudly warn a young man where he is going. Without, his friends beckon him back, and even try to pull him back if he persists in going in the wrong direction.

We shall not attempt to analyze the motives that prompt this spirit of helpfulness. It is enough for the good of the world that it exists.

Sympathy with a man who has started wrongly is almost universal. His good qualities are exaggerated and his bad qualities glossed over.

Oliver Wendell Holmes has said that it was almost a temptation to become a drunkard, so fine were the predictions of what he might have done if he had led a sober life.

You often see a man pointed out as an example of a brilliant intellect ruined by drink or self-indulgence. The chances are ten to one that had the man plodded along steadily he would have been of only average capacity.

Sympathy with his shortcomings blinds his friends to his real character.

Criminals easily excite compassion. There is more agitation for reform in the administration of prisons and jails than there is in the conduct of charitable institutions.

Men and women who will dutifully walk past dozens of poor women carrying loads of wood on their heads to cook the fire for the babies at home will become frenzied because some murderer has gone to prison for ten years instead of being paroled in the custody of an insanity expert.

The failure—the deliberate, intentional fail-

ure—who spurs every effort to set him right with the world, is the subject of owlish discussion in the colleges and maudlin sympathy in the streets.

Let a man once turn to crime and he has abundant offers of help. Judges are invariably lenient with first offenders. The chance for which some men are continually crying is seldom withheld from them. In fact, it is offered over and over, even after there is reasonable certainty that it will be refused.

It would be better, of course, to use a little more judgment in bestowing sympathy. For example, the philanthropist who gets excited about the poor criminal and demands reform in prisons and jails would better turn his attention to abating conditions that are sure to turn out more criminals.

A dollar spent in tenement reform will do more good work than ten dollars spent in prison reform. A little help given an honest, industrious man out of a job and looking for work would be worth a hundred times the same help extended to the man who has decided that he is going to destruction, and that it is nobody's business but his own.

Much of the tragedy of life is contributed by those who take the wrong road, throwing away their talents and bringing suffering and sorrow upon innocent women and children who are so unfortunate as to be dependent on them.

But there is no excuse. The world is not cold and hard and merciless. It is indolent and careless, and blinds itself to trouble it might easily see and cure. But the intentional failure is so conspicuous that he cannot be overlooked. He thrusts himself and his troubles upon his friends, and they give him their time and their sympathy. And when he disregards both and steadfastly continues on the downward path he deserves no help.

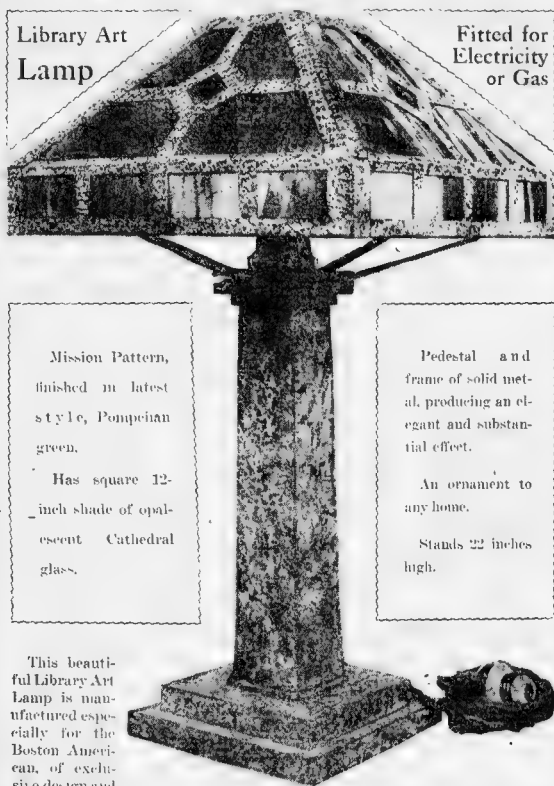

HERE ARE TWO MORE OF THE SERIES OF HANDSOME BOSTON AMERICAN Household Premiums

FOR THIRTY COUPONS AND A SMALL PAYMENT

Start Saving To-day ————— Remember More Coming

Library Art
Lamp

Fitted for
Electricity
or Gas

Mission Pattern,
finished in latest

delivered by wagon or express.

A Complete Dinner Service

FOR SIX PERSONS

44 Pieces Highest-Grade American Semi-Porcelain 44 Pieces

The picture of this exquisitely decorated set of dishes, although reproduced from a photo-
graph, can give no conception or idea of its beauty. It is impossible to reproduce in a picture the
dainty and elegant dished decorations, the thickness of the ware, the richness of the glaze, the arti-
stic models and patterns of the pieces. We guarantee absolutely that the workmanship, decorations
and finish of our sets are equal in every respect to the very highest priced Haviland, Limoges or
English imported china.

The decorations on these sets consist of garlands of roses interspersed with artistic scroll
work in gold. The effect is both new and attractively dainty and conservative. The roses buds
and ferns are shown in their natural colors, and all the splendor, glory and beauty of the orange
and natural coloring is brought out.

A useful practical set for everyday use consists of the following pieces: Six large dinner
plates, six soup plates, six dessert dishes, six cups, six saucers, six individual butter dishes, one
large meat platter, one vegetable dish.

Thirty consecutive coupons from the Daily and Sunday American and \$2.00 if called
for at Main Office; \$2.25 delivered by wagon or express.

PRESIDENT AND DIRECTORS OF BOSTON'S HUSTLING REAL ESTATE EXCHANGE

REAL ESTATE MEN ARE OPTIMISTIC

Despite Slight Let-Up in the Trading, Prospects Are Considered Very Bright.

Notwithstanding the fact that the volume of business has been somewhat less than in the past few weeks, the real estate men of Boston are optimistic. They believe that the market is still in a healthy condition and that the prospects for the future are very bright. The slight let-up in trading is attributed to the fact that the market is still in a healthy condition and that the prospects for the future are very bright.

WEYMOUTH BLUFFS BEAUTIFUL TRACT

Bank Savings Declares There Is No More Promising Site for All-Year Homes.

Bank Savings declares that there is no more promising site for all-year homes than the Weymouth Bluffs. The bank has recently acquired a large tract of land in Weymouth and is planning to build a large number of all-year homes on the site. The bank believes that the site is very promising and that the homes will be very popular.

BIG WOBURN GLUE FACTORY IS SOLD

Independent Packing and Refrigerator Business Will Be Organized.

The big Woburn glue factory has been sold to a group of investors who plan to organize an independent packing and refrigerator business. The factory is located in Woburn and is one of the largest of its kind in the city. The investors believe that the factory is very promising and that the business will be very profitable.

FAST SUBURBAN LINE DEMANDED

Boston to Lowell Trolley Would Be of Great Benefit to Realty Along the Route.

The proposition of a fast suburban line from Boston to Lowell is being actively considered by the city and state. The line would be a trolley line and would provide a fast and convenient means of transportation between the two cities. The city and state believe that the line would be of great benefit to the realty business along the route.

GREAT ACTIVITY IN LAND ENTERPRISES

The Development of Suburban Property Particularly Rapid at Present Time.

There is a great deal of activity in land enterprises at the present time. The development of suburban property is particularly rapid and is expected to continue for some time. The city and state believe that the development of suburban property is very promising and that it will be of great benefit to the realty business.

AMERICAN HOMES ARE MOST MODERN

Comforts of Life in New and Old World Compared in Magazine Article.

POOR SUFFER IN ENGLAND

Man of Small Income in America Have Great Conveniences at Moderate Cost.

THE comparative comfort of life in the United States as compared with England is discussed in an interesting article in the November issue of the "American Homes" magazine. The article compares the comforts of life in the two countries and finds that the man of small income in America has great conveniences at a moderate cost. The article also discusses the conditions of the poor in England and finds that they are in a very poor state.

IMPORTANT REALTY DEAL IN MARYLAND

A. C. Chisholm Sells to M. J. Snow Six Three-Apartment Houses on Parker Estate.

Papers have gone to record closing the largest and most important transaction in the history of the Maryland real estate market. A. C. Chisholm has sold to M. J. Snow six three-apartment houses on the Parker estate. The houses are located in the city of Baltimore and are one of the largest and most important transactions in the history of the Maryland real estate market.

Schuyler Street Deal.

In addition to the above was secured the house No. 1012 Schuyler street, Roxbury, near Bowdoin street, which is occupied by Mr. Chisholm. This house is one of the largest and most important transactions in the history of the Maryland real estate market. The house is located in the city of Baltimore and is one of the largest and most important transactions in the history of the Maryland real estate market.

Will Build Colonial Houses.

Mr. Chisholm has decided to build a number of Colonial houses in the city of Baltimore. The houses are to be built on the Parker estate and are one of the largest and most important transactions in the history of the Maryland real estate market. The houses are to be built in the city of Baltimore and are one of the largest and most important transactions in the history of the Maryland real estate market.

REALTY TENDENCY UPWARD, SAYS VIAUX

Real Estate Exchange Secretary Says Further Taxes Should Be Resisted.

NOW HAS GREAT BURDEN

Analyses Conditions in New York and Boston and Points to Differences.

By FREDERIC H. VIAUX, Secretary of the Boston Real Estate Exchange.

There is a certain amount of optimism in the physical conditions of the city of New York and Boston. The city of New York is in a very good state and the city of Boston is in a very good state. The city of New York is in a very good state and the city of Boston is in a very good state. The city of New York is in a very good state and the city of Boston is in a very good state.

Changes in Conditions.

Looking in toward the city, the physical conditions of the two cities have been analyzed. The city of New York is in a very good state and the city of Boston is in a very good state. The city of New York is in a very good state and the city of Boston is in a very good state. The city of New York is in a very good state and the city of Boston is in a very good state.

Tendency Upward.

Whether or not the tendency of the market is upward or downward, the realty business is in a very good state. The city of New York is in a very good state and the city of Boston is in a very good state. The city of New York is in a very good state and the city of Boston is in a very good state. The city of New York is in a very good state and the city of Boston is in a very good state.

BE SEASHORE LOTS.

C. E. Jennings Best Buy by Purchasers of Many Sites.

REPORT BIG DEMAND.

Buys a Ten Acre Florida Farm

or Truck Farm

That Will Yield \$300 to \$1,000 Per Acre

READ THIS FIRST; IT TELLS OUR PLAN

The Type Is Small; the Opportunity Immense

The type of farm we are offering is a small one, from 10 to 40 acres, and is of the type that is most profitable. It is a farm that can be bought for \$1,500, but will average about \$300 per acre. It is a farm that is surrounded by fine roads, elegant homes, superb educational advantages. A home that will make you independent and enable you to live in ease and comfort.

Land with titles guaranteed. Land that we pay taxes on until delivery of deed to you. Lands on which you pay nothing but the price at the terms mentioned here. Lands that can pay \$1,500, but average about \$300 per acre. Lands that lie surrounded by fine roads, elegant homes, superb educational advantages. A home that will make you independent and enable you to live in ease and comfort.

OUR PLAN

We are offering to sell you an acre of land in Florida. The land is in a beautiful location, and is of the type that is most profitable. It is a farm that can be bought for \$1,500, but will average about \$300 per acre. It is a farm that is surrounded by fine roads, elegant homes, superb educational advantages. A home that will make you independent and enable you to live in ease and comfort.

A home that will make you independent and enable you to live in ease and comfort.

READ THIS LETTER FROM ONE OF THE MEN WE SOLD LAST JULY

This Is Why We Make Our Guarantee So Strong

I have a letter from one of the men who bought a farm from you last July. He writes that he is very satisfied with the land, and that he is making a good profit on it. He says that the land is in a beautiful location, and is of the type that is most profitable. It is a farm that can be bought for \$1,500, but will average about \$300 per acre. It is a farm that is surrounded by fine roads, elegant homes, superb educational advantages. A home that will make you independent and enable you to live in ease and comfort.

Write now if you want one of these choice farms; they will not last long. Remit by registered mail or money orders.

Florida National Land Company
Old Colony Building, CHICAGO, ILL.

THESE MEN ARE BACK OF THIS LAND

Charles S. Painter, President of the Florida National Land Co., is a man who is known all over this country. He was for 20 years engaged in the newspaper business and is known to every publisher of daily papers of value in America and Canada. He has for years had a Florida home, though his residence is Chicago, and his business headquarters are in Chicago. He is in direct and daily touch with every department of this company and can be found at his desk in the Chicago office every day. He stands back of every statement here made.

W. Owen Gentry, Treasurer of this company, resides in Fort Wayne, Ind. No better citizen can be found in this section of Indiana or one whose reputation is free from failure or blamish. The following letter from a United States Depository and National Bank of Fort Wayne, Ind., tells you how you may regard the man to whom you send your money: Morris Jones of Chicago, Ill., is a doctor, and is of great business standing to his companion officers of this company. These men are not figureheads, but are actively engaged in directing this colony, and will personally see that every obligation here made is carried out to the strict letter of moral and legal obligation. Do not buy until you know with whom you are dealing. These men and this company court, and successfully meet the most stringent investigation.

A COUNTY COMMISSIONER OF MARION COUNTY, WHERE THIS LAND LIES, WROTE THIS LETTER.

Profr. Marion County, Fla. March 1, 1909. I have been very much interested in the land offered by the Florida National Land Company. I have seen the land, and it is of the type that is most profitable. It is a farm that can be bought for \$1,500, but will average about \$300 per acre. It is a farm that is surrounded by fine roads, elegant homes, superb educational advantages. A home that will make you independent and enable you to live in ease and comfort.

WHAT A NORMAL FULL BEARING ACRE CAN PRODUCE EVERY YEAR TO THE MAN WHO WILL REALLY WORK.

Oranges, 100 bushels; Apples, 100 bushels; Peaches, 100 bushels; etc. The land is in a beautiful location, and is of the type that is most profitable. It is a farm that can be bought for \$1,500, but will average about \$300 per acre. It is a farm that is surrounded by fine roads, elegant homes, superb educational advantages. A home that will make you independent and enable you to live in ease and comfort.

TEMPERATURE, RAINFALL AND HEALTH CONDITIONS

The climate and rainfall as recorded at the county seat of Marion County averaged during past twenty years, from 1889 to 1908. The land is in a beautiful location, and is of the type that is most profitable. It is a farm that can be bought for \$1,500, but will average about \$300 per acre. It is a farm that is surrounded by fine roads, elegant homes, superb educational advantages. A home that will make you independent and enable you to live in ease and comfort.

FLORIDA BANKERS, MERCHANTS, JUDGES AND PUBLIC OFFICIALS SIGN STATEMENT

For the purpose of making a statement of the land offered by the Florida National Land Company, we, the undersigned, have examined the land, and it is of the type that is most profitable. It is a farm that can be bought for \$1,500, but will average about \$300 per acre. It is a farm that is surrounded by fine roads, elegant homes, superb educational advantages. A home that will make you independent and enable you to live in ease and comfort.

FLORIDA NATIONAL LAND CO.
Old Colony Building, Chicago, Ill.

Guarantee—Please send me free of any and all charges as per your announcement in the Boston Sunday American, your book, which fully describes the lands you have for sale, together with proof of the earnings of land that lies alongside of this land map of Florida showing how your lands are crossed by the Seaboard Air and Atlantic Coast Line Railroads, and in fact send all matter pertaining to this land. I do not agree to buy any land, and I want you to do so to send this descriptive matter to me free. If I am convinced I will buy, and I am responsible enough to carry out anything I agree to do.

Coal Crushing to Begin at Cranston Mines

"Providence Coal" Stock Advances November Third

believe the difference between these figures promises a large profit? If so, now is the time to invest at Three Dollars per share.

Advent of Cranston Coal on Market Marks Last Opportunity to Buy Stock at Three Dollars Per Share

Anthracite coal is retailing in Boston today at \$7.75 per ton. It can be mined at Cranston for Fifty cents per ton. Do you

Picture of a visiting party of investors taken at beginning of main quarry cut showing plainly nearness to surface of vein. Every man in this picture is standing on coal.

Three facts of great importance to New England stand out in bold relief. First—That millions of tons of pure, hard, free-burning anthracite coal has been proven in the State of Rhode Island. Second—That because of nearness of the veins of coal to the surface, it can be mined here much cheaper than in Pennsylvania. Third—That nearly one-half of the cost of the ton of coal for which you pay \$7.75 to-day is transportation cost, hence on account of its location every ton of coal in the mines of Rhode Island is worth easily three dollars more than it would be if it were located in Pennsylvania.

This phase of this advertisement is worthy of consideration. Either the statements printed here are true or they are untrue. If they are untrue they constitute a great fraud and deserve the attention of the authorities and the public press, and you may be sure they would receive it. This is printed over our own name, we assume full responsibility for every statement it contains and challenge the public to find one misrepresentation. Slightly more than an hour's ride from Boston. Having been visited by many newspaper men and hundreds of reputable citizens, you must, even though you may not know our house, abandon all question as to the integrity and dependability of this advertising. If there was one remaining doubt in mind, it should be dispelled by our proposition to take every investor who buys eighty-five shares or more to visit the mines at our own expense and refund his money if he does not find everything just as represented. Having thus seemingly disposed of all question as to our truthfulness, let us consider the other side and determine what these things promise if they are true. For that purpose let us sum them up that the investor may see whether he can afford to visit the matter indifferently.

1. We state that there is good hard coal within five miles of the heart of Providence, R. I.
2. We say that this coal, either for domestic use or for steaming purposes, burns quite as satisfactorily as the best Franklin coal.
3. We state that it may be seen burning at the mines either under boilers or in stoves.
4. We state that thousands of tons are already exposed to view.
5. We state that the extreme distance between the two shafts and two tunnels which already cut into or through present vein is 6,000 feet, or a little more than a mile.
6. We state that the vein is approximately forty feet wide.

7. We believe that under present conditions mining cost should not exceed fifty cents per ton. Now, to sum up, Mr. Investor, if all of these statements are true; if there is, as we believe, a vein of good hard coal 6,000 feet long and forty feet in width, calculating one and a half ton per cubic yard, would approximate a million tons for seventy-five feet of depth.

The freight saving of three dollars per ton alone on a million tons would be three million dollars, or equivalent to the capitalization of the company.

We do not intend to tell the investor where he should put his money, but we are giving him facts and figures from which he may draw his conclusions, as we have done, but of one thing we feel sure—that these figures and statements are so strong as to demand the investor's attention. He cannot afford to pass them by without investigating their truth and soundness.

1. The product is lumber. The amount of coal, like the forests of lumber, is growing smaller with each year. To be sure, new lumber is being grown and new coal beds are being formed, but years are required for the first and centuries for the latter, while consumption goes on much faster than production. Hence every day a coal field investment stands Nature's own law of supply and demand makes it grow in value.
2. Safety from destruction. A coal mine is safe from all the elements except fire, and even that is much more easily contained than about ground. It carries its own insurance against disaster. Its bank account may be looted, but its real treasure, the coal bed, can hardly be carried off in the night.

Nothing in the events of recent years has aroused the widespread interest as the development of the anthracite coal fields of New England. Upon no other subject will you find such a diversity of opinion among your neighbors and friends, or among men of affairs.

A thousand people have visited either the mines at Cranston or those at Portsmouth. All of these believe and are enthusiastic about the future of coal mining in Rhode Island. Many thousands of their friends, who have learned through them, also believe and are investigating. Others who have not visited the mines are deeply interested because they argue sanely that the property and the coal must be just as represented, or else, being so near at hand, the slightest misrepresentation would be noticed in a day by the public press and by the authorities. Otherwise every sale of stock would fall and refund be demanded as soon as the stockholder visited the property—as they may do at this company's expense, under its offer.

There are, however, in addition to these, many who cannot conceive of anything of worth growing near their own home. They have never been trained to think of anything of mineral value in this section except the granites of New Hampshire and Vermont, and they are unable to realize the great coal beds of Rhode Island. They are not exactly pessimists, but they are "bears" on the resources of New England. When Henry M. Whitney began to reopen the old mines at Portsmouth they pronounced that he would never be able "to pump Narragansett Bay" out of the work. Notwithstanding their prediction, it is almost accomplished. They doubted the value of that company's stock at two dollars per share, but to-day it is sought for at eleven dollars per share, and the doubt of Thomas of that will be no doubt be one of the first to buy these coals and contribute to the earnings of these companies.

Providence Coal Mining Company

CONSISTING OF
Authorized Capital - \$3,000,000
600,000 Shares of Par Value Five Dollars Each

Hancock & Co. (Inc.) are authorized as exclusive fiscal agents to sell 200,000 shares. A small remaining part of the Three Dollar allotment is offered this week. After November Third it will be held for a higher figure. Stock offered is Treasury stock, full paid and non-assessable, and proceeds will be used for machinery and working capital. A payment of 20% will secure stock at present price before the advance.

Cranston Coal, as the product of the mines of this company is called, is a hard free-burning anthracite coal. It contains a high percentage of carbon, and in burning shows great number of brilliant thermal units than Pennsylvania Anthracite. It is a little harder and burns a little longer. Combustion is complete, leaving a clear and clearness ash.

LOCATION OF PROPERTY
The company controls four hundred and thirty acres of mining rights in the town of Cranston, R. I., about four and one-half miles from the City Hall of Providence, and is about Fifty-Two miles from the city of Boston. It is cut through the center by Reservoir Avenue, one of the best paved thoroughfares of the city of Providence.

SHIPPING FACILITIES
The New York, New Haven & Hartford Railroad runs within about one-eighth of a mile of the property. Right of way has already been secured for the building of side tracks to the mine, and construction will begin as soon as materials arrive. Another steam and two electric lines pass very near.

HISTORY OF PROPERTY
This mine is located on what is well known in Rhode Island as the "Balding farm." It was under lease for many years and operated for the granitic which formed the roof of the present coal vein. By the death of the lessee it came into the market and was acquired by people knowing the value of the coal beneath.

PRESENT DEVELOPMENT
Consists of two tunnels and two shafts. One of these tunnels shown in the cut above is now being stripped, and the coal will be quarried out of the open cut rock. All that appears in the background of the picture is solid coal. The vein here is 40 feet wide, and has a dip of 20 degrees. At this point the coal vein comes within about eight feet of the surface. At the upper tunnel six thousand feet, or a little more than a mile, the vein is thirty-eight feet wide and begins about forty feet below the surface.

The upper tunnel to near the building which is shown above, which is the property of the company, and for which important plans will be later announced. This tunnel runs about one hundred feet in coal and between these points the vein lies at about the same average depth from the surface. Below the lower tunnel are two shafts showing the same vein and conditions.

MACHINERY AND EQUIPMENT
The new machinery now on the ground consists of derricks, etc., such as are generally used in quarries and small coal crusher and revolving screen, with necessary power plant. During the present week lifting and crushing of coal should begin, and in a few days later the screen should also be in position to begin the process of screening and sizing. As the first output is already over for delivery at the mine, it will not be necessary to wait the completion of railroad sidings before beginning to market coal. The present plant has a capacity of 200 tons for an eight-hour day, for 200 tons for a day of three shifts.

The development plans of the company involve the installation of nine other units, each of 100 tons per day, now being erected, which will give the company a capacity of five thousand tons per day.

PLANS FOR DEVELOPMENT
The shallowness of the vein making possible the cheapest known method of mining, quarrying will make the mine cost of Cranston Coal the lowest of any hard coal mine in the country. As the vein is followed down the cost of mining will increase slightly, but with a vein 40 feet wide and more than a mile in length it will be many years before developing conditions are faced. The cost of mining during this time should not exceed fifty cents per ton. There is now no necessity of expensive pumping machinery; for artificial lighting, for artificial ventilation, or for timbering.

NEARNESS TO MARKET
The company should supply coal all at the mine, and coal consumers of Providence for which delivery wagons can be loaded at the mine. Within a one dollar per ton freight rate circle, which includes Boston, there are three million people, and a market for more than 100,000 tons per day.

DIVIDENDS
These conditions, together with good management, should insure large dividends upon this company's stock. A net earning of two and a half to three dollars per ton upon the present shift of 100 tons per day or upon the future capacity of 500 tons per day should be approximated.

SUBSCRIPTION, PAYMENTS, ETC.
A small amount of the three dollar allotment still remains to be sold, and subscription may be made at or mailed to the office of the fiscal agents, for which a blank is printed below. The full amount of cash may be enclosed or 20 per cent may be paid at the time application is made, and the balance of 80 per cent, for January 10th, 1910, 20 per cent, on February 10th, 1910, and 20 per cent, on March 10th, 1910. Only these subscriptions mailed and bearing postmark earlier than midnight of November Third will be accepted at three dollars per share, and we reserve the right to reject any applications mailed earlier in case our allotment at this price is oversold.

Send all remittances by bank draft, check, postoffice or express money order or registered, payable to Hancock & Co., Inc., 92 State St. Additional information will be furnished on request. See blank below.

Steam is up, the boilers have been tested, and within a few days the derricks of the first unit will begin to swing at Cranston in the only producing coal property of New England. Hundreds have visited Cranston, have burned the coal at the mines and in their homes and are equally enthusiastic. All agree that it will be a great dividend earner. Nothing could be fairer than this company's proposition. If you buy eighty-five or more shares, either for cash or by making a cash payment of 20 per cent, you will be taken to the mines free of expense and money refunded if not found to be just as represented. (See coupon below.) Certainly such a proposition justifies your confidence in everything we say about it. It is well to hear in mind that worthless properties, frauds, fakes and get-rich-quick schemes are always located far away, where the expense in time and money to see them is prohibitive, and that they never make such proposals as this. Distance from the investors' home is their security. Upon the other hand "Providence Coal" stock is being offered right here in New England and not elsewhere. It is the desire of the management that the very people who are to buy the coal shall be part owners. A year from today all New Englanders who can get it will be buying Cranston Coal and paying money into the pockets of those who buy this stock now, and a share then may command several times the present price. By reserving 20 per cent, now you can save the amount of the coming advance. You can invest now and then invest at our expense. If you cannot spare a day to go yourself, send someone else in your stead. If you desire to buy less than eighty-five shares, get some of your neighbors to join you, in order to get a chance to invest without expense.

As is the policy of this company, subscription for any number of shares, from one share up, will be accepted. If this advertisement does not fully answer any question which arises in your mind, do not hesitate to come to our office to have them answered, or, if you cannot come, write us. You will be sure to get a satisfactory answer. We may be able to refer you to some one in your town who has already visited the mine.

REQUEST FOR INFORMATION

HANCOCK & CO., INC., Fiscal Agents,
Ground Floor, 92 State St., Boston.
Gentlemen: Without obligation on my part will please send me full particulars as to the Providence Coal Mining Company, including a copy of your subscription form. The financial plan, as issued.

Boston's Progress in the Twentieth Century

ACHIEVEMENTS OF CITY CIVIL IMPROVEMENT

Citizens Point with Pride to What Has Already Been Accomplished in Making Boston Better

By JOSEPH QUINCY.

It is a common saying that the progress of a city is measured by the progress of its public utilities. In the case of Boston, this is no exception. The city's public utilities, which are the backbone of its industry and commerce, have made remarkable progress in the last few years. The city's water supply, for example, has been improved by the construction of the new water works at Framingham, which will supply the city with pure water for many years to come. The city's gas supply has also been improved by the construction of the new gas works at Framingham, which will supply the city with pure gas for many years to come.

The city's electric supply has also been improved by the construction of the new electric works at Framingham, which will supply the city with pure electricity for many years to come. The city's sewerage system has also been improved by the construction of the new sewerage works at Framingham, which will supply the city with pure sewerage for many years to come. The city's public health has also been improved by the construction of the new public health works at Framingham, which will supply the city with pure public health for many years to come.

located in the John Hancock Building has a capital and surplus of over Two Million Dollars (\$2,000,000). It was established as a State bank in 1853, and was chartered as a National bank in 1864. For over half a century it has faithfully served the public, and has never passed a dividend.

It respectfully solicits accounts of every nature, on a basis of mutual profit, and offers to its correspondents and depositors the advantages of its long experience, complete organization and perfect equipment.

A Guarantee of Title By This Corporation

In the Modern Method of insuring Title and Mortgage of Real Estate the cost is no more than that of a Lawyer's opinion, which gives no guarantee. The entire charge, including preparation of all papers and all court proceedings, known from the start.

MASSACHUSETTS TITLE INSURANCE CO., 70 STATE ST., BOSTON

The Mexican Telephone & Telegraph Company

The Mexican Telephone & Telegraph Company was organized under the laws of Mexico in February, 1909, for the purpose of acquiring the entire property of the Mexican Telephone Company, a corporation organized under the laws of the State of New York and doing business in the Republic of Mexico. At that time the corporation of the Mexican Telephone Company had expired, and in order to obtain a new corporation from the Federal Government it was necessary to organize a new corporation. The Mexican Telephone Company was making money, it required all its surplus capital for other new construction, consequently it was in a position to rebuild the plant and the reorganizing took place to save the valuable rights, franchises and business, which the present company, the Mexican Telephone & Telegraph Company now enjoys in the Republic of Mexico. Since the reorganization has taken place the Mexican Telephone & Telegraph Company has increased its capital from about \$500,000 to \$800,000, and with every prospect for much greater increases in the near future. This increase in capital has been made up of \$300,000 in new stock, making a total for the present year of approximately \$1,000,000, compared with \$500,000 for the last year. Five per cent is paid semi-annually on shares of the preferred stock, amounting to \$150,000, which, together with the sinking fund, makes a total of about \$200,000. The present dividend charge about \$50,000, leaving a net profit of about \$150,000.

At that time the corporation of the Mexican Telephone Company had expired, and in order to obtain a new corporation from the Federal Government it was necessary to organize a new corporation. The Mexican Telephone Company was making money, it required all its surplus capital for other new construction, consequently it was in a position to rebuild the plant and the reorganizing took place to save the valuable rights, franchises and business, which the present company, the Mexican Telephone & Telegraph Company now enjoys in the Republic of Mexico. Since the reorganization has taken place the Mexican Telephone & Telegraph Company has increased its capital from about \$500,000 to \$800,000, and with every prospect for much greater increases in the near future. This increase in capital has been made up of \$300,000 in new stock, making a total for the present year of approximately \$1,000,000, compared with \$500,000 for the last year. Five per cent is paid semi-annually on shares of the preferred stock, amounting to \$150,000, which, together with the sinking fund, makes a total of about \$200,000. The present dividend charge about \$50,000, leaving a net profit of about \$150,000.

OUT OF THE E

Investors of New England Early Foresaw Results of
Dawning of Age of Electricity, and as an Outcome
of Their Clear Sight This City Is Now the Great
Copper Centre of the Country.

There are to-day many important coal producing companies, such as the United States Coal and Oil and the New River Fuel Company, owned by investors in New England, and the New River Fuel Co., the greatest mines in America, which have been started up by New England capital with more courage and skill than by the leaders in any other financial center.

that in the case of the Lake Superior district, the prospectors have remained under the surface ownership or in corporations controlled by a very few men on the ground, so that while Boston men have gone out into the mines and mined tremendously in their development, there has been no very important concentration of ownership. In the case of the gold properties outside the district was not needed and leaders in the financial world in Boston have been careful to keep the securities of the poor ones away so far as possible, and to protect to have made a geological survey of the district, now known as the Lake Superior copper district. The work was completed and reports made to Congress in 1870.

This Lake Superior district has proved so fruitful to the copper industry, as well as to science, and so many of the great English fortunes have been built up from the output of the mines, that a word as to the geological formation and the character of the rock will prove interesting, although it would require a book of

The age of iron and steel has been developed that there are probably no large deposits now being discovered. The age of copper has not yet been contradicted by the great steel-consuming companies.

The age of electricity opened with the use of the telegraph, later on the telephone, then the street railways and now, finally, the electrification of the street car.

Aside from the development of the demand for copper made by the electrical period, the utility of brass in

This action resulted in the deposition of the copper in the three different metal rods that make up the formation. But the same kinds of formation have become generally known as apatite and conglomerate, as the trap rock is not found to contain mineral values of any commercial importance. The copper is found in veins which cut through the conglomerate and in apatite and conglomerate beds which conform with the series.

have been in which is known as the Lake district in Michigan, where the best grade of the metal is produced, and although operations have been going on there for some fifty years, there are constant additions to the number of producing properties and many new exploratory companies have been formed as late as during the last few months.

Unfortunately, the Loughton died before his work was anywhere near completed, and, still more unfortunately, most of his most valuable data, which he had gone far enough, however, to impress upon Congress the great possibilities which underlay the great northern Michigan wilderness, and by an act of Congress

Brake on Progress.

Rise of Tax Rate.

After 1870 Boston, in common with other American cities, was obliged to spend increasing sums of money in order to provide for the conditions brought about by urban growth. In 1860 the city rate was \$10.30 per \$1,000, and by 1870 it had reached \$15.50 per \$1,000. The tax rate, in fact, had quadrupled between 1822 and 1870, and it became necessary to devise large amounts of money from the city. The council of wealthy taxpayers began to make large propositions as early as 1840, and the situation remained for the next twenty years.

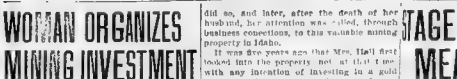

It was 1870 and 1880 not less than \$2,000,000 of taxable property was required for the city by persons who either lived in the North or South.

The experience of other cities and other states has not been so radically different from that of Boston. The method of finding all property at a uniform rate, which seems to have developed little complaint when a tax rate of \$1 per \$1,000 is used to meet the public requirements, absolutely breaks down when the tax rises to \$10 or \$15 per \$1,000. A tax of \$15 per \$1,000 amounts to one third of the income from all securities, which do not ordinarily yield more than 4 or 5 per cent interest.

Many years ago, when the question of

Boston's growth in its present position as one of the great centres of population of the world has taken place mostly within the last half century and in a constantly increasing ratio. For the first two hundred years of its existence it was scarcely more than a large town.

There is very little data from which to estimate the population of Boston during the first decade after its settlement. It is recorded that in 1630 the Bay must have contained not more than 2000 people.

Boston's History Gives It High Rank Among Great Cities That Do Things

RED NORTHERN COLONIES IN INSPIRING REVOLUTION

City Has Borne an Important Part in Every War in Which This Country Has Been Engaged, and Has Achieved Great Distinction in Commerce and Industry and Education.

Boston is a city that has a long and distinguished history. It is a city that has borne an important part in every war in which this country has been engaged, and has achieved great distinction in commerce and industry and education. It is a city that has a long and distinguished history. It is a city that has borne an important part in every war in which this country has been engaged, and has achieved great distinction in commerce and industry and education.

Early in the nineteenth century, when the infant Republic was a second yearling with the mother country, Boston bore an important share in the struggle which convinced Great Britain that the importance of Yankee sailors out of the American navy was not much in favor of the British. It was in Boston that the first American flag was raised, and it was in Boston that the first American ship was built. It was in Boston that the first American ship was built, and it was in Boston that the first American ship was built.

Took Part in Every War. Boston took a prominent part in every important war of the United States. It was in Boston that the first American flag was raised, and it was in Boston that the first American ship was built. It was in Boston that the first American ship was built, and it was in Boston that the first American ship was built.

Bold and Enterprising Men. The early pioneers of Boston were bold and enterprising men. They were men who were not afraid to take risks, and who were not afraid to do things that were new and different. They were men who were not afraid to take risks, and who were not afraid to do things that were new and different.

Saw Manufacturing Future. It was Boston's vision of the future that led to the development of the manufacturing industry. It was Boston's vision of the future that led to the development of the manufacturing industry. It was Boston's vision of the future that led to the development of the manufacturing industry.

Developed Inland Resources. Boston's vision of the future led to the development of the inland resources of the country. HAS ACHIEVED SUCCESS IN THE FIELD OF MINING MANAGEMENT

AMSTER BUILDS UP COPPER PROPERTIES

His Management Results in Increased Output and Rise in Value of Shares.

N. L. Amster.

Among the large mining enterprises in which New England people are interested, not least are the Amster Copper Company and the Boston and Cobalt Copper and Silver Mining Company, in all of which Mr. Amster has large personal holdings and which he is president.

Probably one of the most noteworthy things that Mr. Amster has done was the taking over of the Boston Copper and Silver Mining Company, which was a company that had been in existence for many years, and which had a large and valuable property in the Boston area.

Without Depression. The result of the management of the Boston Copper and Silver Mining Company has been a steady increase in the output of the company, and a corresponding increase in the value of its shares.

Worked for Tolerance. It was a very early day when the Amster Copper Company was first organized, and it was a time when the company was faced with many difficulties and obstacles.

First in Education. Boston has been a city that has been a center of education and learning for many years. It has been a city that has been a center of education and learning for many years. It has been a city that has been a center of education and learning for many years.

Fame is World Wide. As an educational center Boston's fame is world wide. It is a city that has been a center of education and learning for many years. It has been a city that has been a center of education and learning for many years. It has been a city that has been a center of education and learning for many years.

BIG FORCE OF MEN NOW RUSHING WORK AT THE MINES OF THE UNITED MICA COMPANY

GREAT DEMAND FOR RICH MICA OUTPUT

Factory Right on the Ground
Finishes the Material Into
Form for Use

The United Mica Company, located at the foot of the North Hill, is now producing mica output in the United States. The demand for mica is increasing rapidly, and the company is meeting this demand by increasing its output.

Experts who have examined the mica taken from the mines have found it to be of the highest quality. The mica is used in a variety of ways, and the demand for it is increasing rapidly.

There is a great demand for mica in the United States. The mica is used in a variety of ways, and the demand for it is increasing rapidly. The United Mica Company is meeting this demand by increasing its output.

Splendid Work of Young Men's Christian Association is a Boston Achievement

First Unit of This Great Body in United States Was Started in the Old South Meeting House Chapel—From This Small Beginning Has Grown Largest Young Men's Organization in Country.

By GEORGE W. MEHAFFEY, General Secretary.

OVER fifty-seven years have passed since the organization in the Old South meeting house chapel of the Boston Young Men's Christian Association, the first in the United States. From this small beginning and as the result of an appeal for extension sent out by the Boston board of directors, there has developed the largest young men's organization in the country, numbering to-day on the North American continent 1,359 associations, bound together by an international organization, with a membership of nearly one-half million and owning property valued at \$10,000,000.

The first forethought of this work was in London, but it has since its largest and best development in North America. No such work could have had the remarkable development and growth which it has attained.

These fifty-seven years the Boston Association has been keeping abreast of the general movement and today ranking among the leading Young Men's Christian Associations in North America. If the association of Great Britain and Ireland were organically connected as in New York, Philadelphia, Chicago and St. Louis the local directors Boston might well be proud to claim the largest group, covering a like area, would be second only to New York.

Before developing more absolutely the achievements of the Boston Association it will be interesting to find out the steps taken to reach more fully the development of the organization. The first step was taken in the history of the Association in 1841 when the first meeting was held. It was then that the first meeting was held, and when they could be found, also by means of a meeting in the city of Boston. This meeting was held in the city of Boston, and when they could be found, also by means of a meeting in the city of Boston.

It is an absolute certainty that the company is in a position to meet the demand for mica in the United States. The demand for mica is increasing rapidly, and the company is meeting this demand by increasing its output.

The United Mica Company, which is one of the largest in the field, is now producing mica output in the United States. The demand for mica is increasing rapidly, and the company is meeting this demand by increasing its output.

The industry has grown steadily since the early days of the American Revolution, and it has become one of the most important industries in the world. The state's textile mills produce a wide variety of goods, from fine fabrics to heavy cloth. The industry has also been a major source of employment for the state's population.

Mills Have Made Cities Prosperous

MASSACHUSETTS is the greatest manufacturing state in the Union. It is the backbone of the state's economy and has been for many years. The industry has grown steadily since the early days of the American Revolution, and it has become one of the most important industries in the world. The state's textile mills produce a wide variety of goods, from fine fabrics to heavy cloth. The industry has also been a major source of employment for the state's population.

Thirty Per Cent. of Whole

The value of cotton goods manufactured in Massachusetts in 1908 was \$1,100,000,000. This represents thirty per cent of the total value of goods manufactured in the state. The industry has grown steadily since the early days of the American Revolution, and it has become one of the most important industries in the world. The state's textile mills produce a wide variety of goods, from fine fabrics to heavy cloth. The industry has also been a major source of employment for the state's population.

Wages in World

Massachusetts has the highest wages in the world. The average wage in the state is \$1.50 per week. This is much higher than the average wage in any other state. The industry has grown steadily since the early days of the American Revolution, and it has become one of the most important industries in the world. The state's textile mills produce a wide variety of goods, from fine fabrics to heavy cloth. The industry has also been a major source of employment for the state's population.

Wages in World

MASSACHUSETTS LEATHER IN THE FUTURE OF FOOTWEAR GOODS

Massachusetts World's Greatest Leather Mart and Shoe Trade Centre

Footwear Made in State Worn in Every City and Town in the United States, and Goes to Half a Hundred Foreign Countries.

By THOMAS F. ANDERSON,

Secretary of the New England Shoe and Leather Association.

MASSACHUSETTS, one of the industrial and intellectual prodigies of the age, is to-day, as in the past, the world's greatest leather mart and the shoemaker for "all creation."

It is in Massachusetts that "the genius of American shoemaking" had its birth, and it is Massachusetts brains that have made the Yankee shoe "a marvel of value and worth."

And not only is Massachusetts tanning the world's leather, making the world's shoes and setting the world's footwear style, but it is furnishing the marvelous machinery, largely produced by Massachusetts inventors, with which the rest of the world is trying to emancipate itself from dependence on American manufacturers.

Massachusetts-made shoes are worn in every city, town and hamlet in the United States. The postal service itself is scarcely more ubiquitous. They also go to half a hundred different foreign countries, in Europe, in Asia, in the Antipodes.

They fill the windows of thousands of attractive retail stores, start at \$100,000 more or less, American citizens from the pages of country papers and magazines, evoke the praise of advertising throngs at international expositions and leather fairs, figure conspicuously in the reports of American consuls, cover the feet of millions of miners, seafaring men, agriculturists, clerical princes and feed and clothe thousands of intelligent American workmen and their families.

Great is the American shoe and leather, still, the industry and skill of the men and women who fashion them.

Everywhere, the shoe is the "king of the world." It is fitting, for several important reasons, that the shoe manufacturers of our State should make of the leather here a much to take account of. For this has been an especial year in the history of their wonderful business.

When President Taft put his annual report down last July and declared that the shoe industry of the United States was the most important of any in the country, it was not only a compliment to the shoe industry, but it was a statement of fact. The shoe industry of the United States is the most important of any in the country. It is the industry that has made the American shoe a marvel of value and worth.

Leather Market of World.

It is, we all know, in the world's chief market for the leather, the leather in this country is the most important of any in the world. It is the industry that has made the American shoe a marvel of value and worth.

It is, we all know, in the world's chief market for the leather, the leather in this country is the most important of any in the world. It is the industry that has made the American shoe a marvel of value and worth.

No Danger of Losing Place.

Naturally, there was a falling off compared with the product of 1907, on account of the bad business conditions existing throughout the country, and which have not yet fully recovered, but the decrease was only 0.01 per cent, against a decrease of 25.91 per cent. in the preceding year.

Compare the 1908 shoe and leather product of \$120,000,000 with that of \$144,000,000 in 1907 and \$140,000,000 in 1906, and it will have to be admitted, even by the pessimists, that Massachusetts appears to be in no immediate danger of losing her place as a national footwear center.

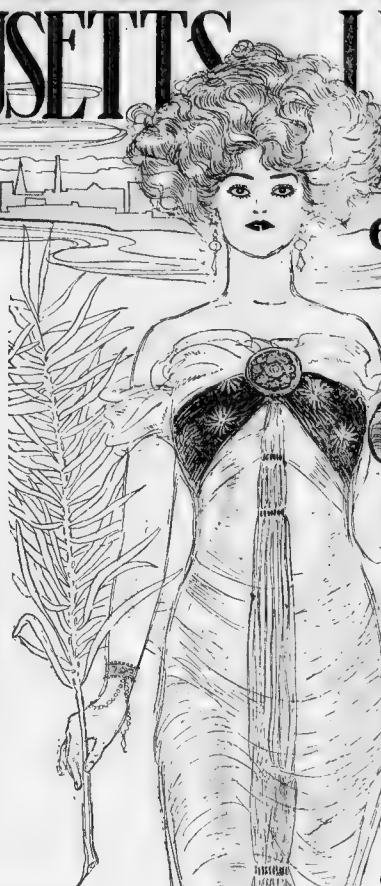

During the machinery department of the boots and shoes made in the United States, placed at the same time to her shoe workers the highest scale of wages for similar labor anywhere in the world, and her shoe factories produce 115 worth of product out of every \$100 worth turned out by the country's manufacturing industries of the shoe-making branch.

It is the shoe industry, in which she is like a pioneer—Massachusetts also holds the lead. Her shoe industry, in which she is like a pioneer—Massachusetts also holds the lead. Her shoe industry, in which she is like a pioneer—Massachusetts also holds the lead.

Build Up by One Industry.

"I have seen Brockton and Haverhill become great centers of the shoe industry, and cities where villages stood before. Salem, once the center of the foot leather trade, where ships drew the waters of every sea, deprived of her commerce, has found a new life and a new prosperity in the leather industry, which now fills her streets with an active, growing population, who rejoice in her traditions, preserve the beautiful old leather of her merchants, and build as the place which is the heart of the shoe industry."

In Lynn, of which the Senator spoke, there was last year manufactured \$31,700,000 worth of boots and shoes, in Brockton \$25,000,000 worth and in Haverhill \$10,000,000 worth—and it was rather "lean" for these three shoe cities at that. Moreover, in Haverhill, where President Taft himself spent such a delightful vacation last summer, located the largest shoe machinery plant in existence, furnishing the

greater part of the wonderful machinery so indispensable to the production of the American shoe, not only for the factories of this country, but for those of England, France, Germany and the other foreign countries that are trying to fight the American shoe in a very American way.

And everywhere that President Taft will go to his great 120,000-mile swing around the globe, he will be going into the face of men and women who will be looking at him with the same interest and admiration as when he followed the same in its course around the world, a few years ago, in his first and last visit to the United States.

The industry of Massachusetts is one of the most ancient of the New England States. It was practically introduced into this country with the arrival of the Mayflower, in 1620. It is told that Thomas Morton, one of the members of the Pilgrims' company, first brought with him a supply of shoes and "puttans." Could that dusky Pilgrim father return to earth today, it doubtless would surprise him to learn that the "puttans" were in the hands of the shoe industry of this country to such an extent that the shoe industry of the world is trying to emancipate itself from dependence on American manufacturers.

Leather manufacturing and the tanning of leather have been in existence in Massachusetts since the roots of that dual industry were deep down in that soil long before the outbreak of the Revolution.

Tanning Begun in 1639.

Light years after the arrival of the "Mayflower" at Plymouth, shoemakers and tanners came over with the revolutionary John Rolfe, and established themselves in Salem and its vicinity. The first attempt at systematic tanning, after the crude methods of those early days, was made in Salem in 1639, and the beginning of the leather industry in Boston by 1640 or thereabouts.

In 1640 the colonial leather industry was in a very primitive state, the shoemaking of leather making in the colony, though probably having no pretensions to a future leather trade, carried a law against the tanning of leather and tanning to save the hides and it was made, a punishable offense, even for boot-makers to damage hides with their knives in making them out. It will be noticed that even to this day there are the echoes of more tender solicitude on the part of the legislature.

The tanning of heavy leather was early commenced in Plymouth also, and was practically continuous with the settlement of the town. It is said that the Indians were the first to discover the special "tanning" qualities of the water in this section, and had utilized it in curing their skins and furs long before the arrival of the white people.

Primitive, indeed, were the methods of transforming hides of cattle into leather in those early days. A hole in the ground, with a water-tight lining of boards, was the principal part of the "tannery." Into this two or three dozen hides were put, covered with tanning liquor and bark and allowed to soak, for from sixty to one hundred days. To-day good leather can be manufactured by the modern "science" or chemical process, in as many hours.

Even now, however, in the early tanning facilities of Boston itself, for in the future methods of New England and chief leather market of the world, leather dressers were granted a place to water their leather at the "tannery." The latter house behind the present Water street.

In those days of high and advancing prices, it was a shame to find that leather, which was so valuable, was so cheap. Now, too, the quality could afford to be better, and the leather industry in Boston, which was so valuable, was so cheap.

The introduction of tanning in Woburn, another famous Massachusetts leather center—dates back to 1640, but the business involved its real impetus from David Crompton, who engaged in the business in the middle of the eighteenth century. It was the Province of Plymouth, the Champlain dam which for the prosperity of this great American industry.

Great Changes in Industry.

Nearly five years ago a tanner that could manufacture 1,000 hides a year was looked upon, as doing quite a respectable business. It is, there are many times as many as 2,500 hides a year.

In the shoe industry, too, great changes have been taking place in the American tanning industry, and that there is little room for comparison between the business of today and that of twenty-five years ago even. New methods of preparing leather, reducing the cost and almost eliminating time, have been introduced. The small tannery has given way to the large one.

To-day, too, the great American center for the tanning of heavy leather, is now the chief leather market of the world, and the leather industry in Boston, which was so valuable, was so cheap.

There is no doubt that the leather industry in Boston, which was so valuable, was so cheap. There is no doubt that the leather industry in Boston, which was so valuable, was so cheap.

An interesting volume of the history of leather in Massachusetts could be written, and an even more interesting one of the shoe. The shoe of the future, in which the shoe industry in Boston, which was so valuable, was so cheap.

There is no doubt that the leather industry in Boston, which was so valuable, was so cheap. There is no doubt that the leather industry in Boston, which was so valuable, was so cheap.

For it is of industrial independence with its shoe industry in Boston, which was so valuable, was so cheap. For it is of industrial independence with its shoe industry in Boston, which was so valuable, was so cheap.

Machinery Almost Human.

The changes that have come to pass in this industry have largely resulted in the hands of men in Lynn and Haverhill, where the shoe industry in Boston, which was so valuable, was so cheap.

In hundreds of new factories located in a score of Massachusetts towns, thousands of skilled workers standing in the ranks of men, in a work of art. These new machines, invented by the shoe industry in Boston, which was so valuable, was so cheap.

There is no doubt that the leather industry in Boston, which was so valuable, was so cheap. There is no doubt that the leather industry in Boston, which was so valuable, was so cheap.

There is no doubt that the leather industry in Boston, which was so valuable, was so cheap. There is no doubt that the leather industry in Boston, which was so valuable, was so cheap.

There is no doubt that the leather industry in Boston, which was so valuable, was so cheap. There is no doubt that the leather industry in Boston, which was so valuable, was so cheap.

There is no doubt that the leather industry in Boston, which was so valuable, was so cheap. There is no doubt that the leather industry in Boston, which was so valuable, was so cheap.

There is no doubt that the leather industry in Boston, which was so valuable, was so cheap. There is no doubt that the leather industry in Boston, which was so valuable, was so cheap.

There is no doubt that the leather industry in Boston, which was so valuable, was so cheap. There is no doubt that the leather industry in Boston, which was so valuable, was so cheap.

There is no doubt that the leather industry in Boston, which was so valuable, was so cheap. There is no doubt that the leather industry in Boston, which was so valuable, was so cheap.

There is no doubt that the leather industry in Boston, which was so valuable, was so cheap. There is no doubt that the leather industry in Boston, which was so valuable, was so cheap.

Ka-Ku-Ka

Cures Consumption

An Absolute Consumption Cure

At last is placed on the market for the American people. Just twelve years experimenting at a cost of thousands of dollars—and experiments which included thousands of actual tests—have absolutely proven that **Ka-Ku-Ka** is the one great boon to civilization—a fitting legacy from the Indians—a marvelous cure compounded from roots and herbs, which they have used for over 200 years.

Three Great Remedies Under the Name Ka-Ku-Ka

Ka-Ku-Ka No. 1—\$1.50 per bot.

A combination of roots and herbs especially prepared for **The Cure of Cancer and Tumors**. The wonderful properties of the herbs and roots do away with the dangers of operation.

Ka-Ku-Ka No. 3—\$1.00 per bot.

The Great Consumption Cure

The crowning achievement of the Century hailed by those who have taken it as the world's greatest cure.

Ka-Ku-Ka No. 2—\$1.00 per bot.

Another special preparation for **Purifying the Blood and Curing Rheumatism**. Assists nature in her every effort of system renovation and up-building of mind and body.

If your druggist cannot supply you send order direct to the Tropical Medicine Co., Wareham, Mass.

A Few of the Thousands of Letters on File in Our Offices

Dear Doctor Welch—
It is with great pleasure that I am able to tell you of the benefit and relief I have received from your Ka-Ku-Ka. I am taking two bottles of it, and I feel much better. I have been suffering from consumption for many years, and I have tried many other remedies, but none have done me any good. I have now taken your Ka-Ku-Ka for two bottles, and I feel much better. I have been suffering from consumption for many years, and I have tried many other remedies, but none have done me any good. I have now taken your Ka-Ku-Ka for two bottles, and I feel much better.

Dear Mr. Welch—
You will be pleased to hear that your wonderful Consumption Remedy, Ka-Ku-Ka, has cured me of my chronic cough and asthma. I have been suffering from these troubles for many years, and I have tried many other remedies, but none have done me any good. I have now taken your Ka-Ku-Ka for two bottles, and I feel much better. I have been suffering from consumption for many years, and I have tried many other remedies, but none have done me any good. I have now taken your Ka-Ku-Ka for two bottles, and I feel much better.

Dear Doctor Welch—
I had a severe attack of grippe last winter, which left me with a very hard cough and the symptoms of tuberculosis developed. Ka-Ku-Ka was recommended to me, and after taking several bottles of it I am frankly as I am thoroughly cured. Very truly yours,
W. W. PEARL

The Tropical Medicine Company,

Fall River Line

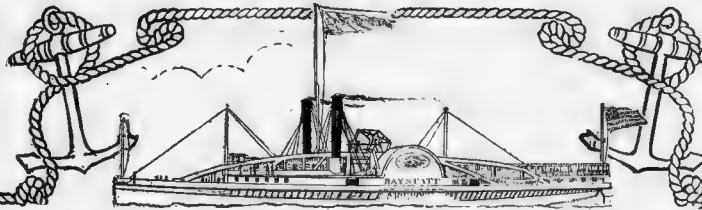

(Splendid Steamers—Splendid Service)

The Long Island Sound Route to New York

THE FALL RIVER LINE was established in 1847. The history of this Line is a history of the development of steam navigation on Long Island Sound. The first Fall River Line Steamer—the Bay State—was the finest example of steamboat architecture of her day. And likewise the Commonwealth, newest of the Fall River Line fleet, is the largest and most magnificent vessel plying on inland waters today.

Up to the time of the establishment of the Fall River Line there had been scarcely any improvement or outward change in appearance of the steamboats that navigated the Sound. The Fall River Line steamers were the first to approach the modern style of steamer construction. In an article on the Fall River Line, published in *Hunt's Merchants' Magazine*, 1847, the Bay State is described as follows:

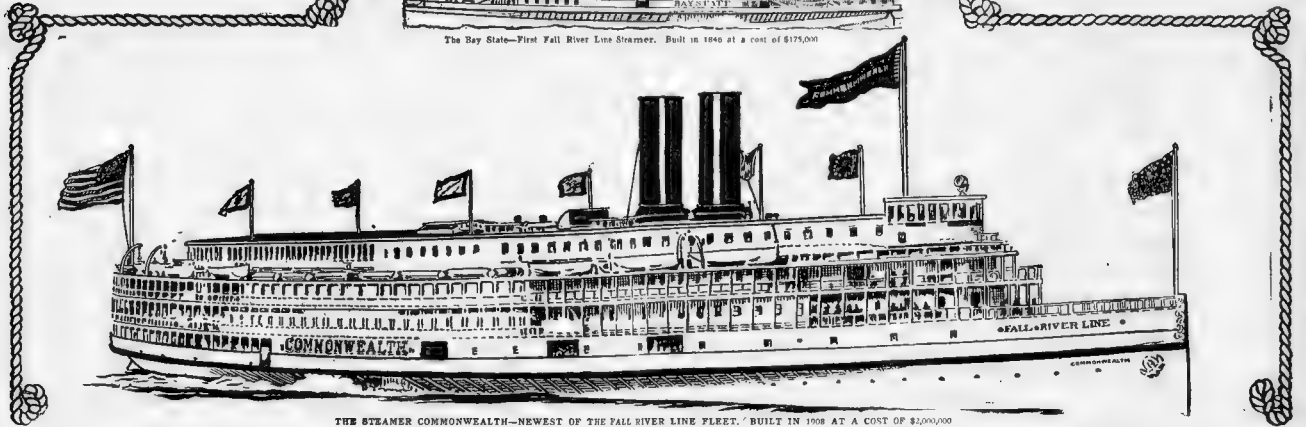

"The Bay State, especially, is a noble specimen of steamboat architecture and was built expressly to ply between New York, Newport and Fall River. The length of this boat is 315 feet; beam 40 feet; depth of hold, 14 feet, which gives her a burthen of 1,500 tons."

The Bay State—First Fall River Line Steamer. Built in 1840 at a cost of \$175,000

"Her engine, a most finished piece of mechanical skill, is 1,500-horse power. She is the largest inland steamer afloat in America waters and has proved herself in severe gales to be in every respect a superior sea vessel."

"The proprietors of the Bay State have spared neither expense nor pains in her construction and fitting out, literally adopting all the new improvements which have been found to lessen the risk of accidents and add to the comfort and convenience of passengers. Her interior finish is chaste and neat, but not gaudy. The total cost of building and furnishing the Bay State amounted to \$175,000."

THE STEAMER COMMONWEALTH—NEWEST OF THE FALL RIVER LINE FLEET. BUILT IN 1908 AT A COST OF \$2,000,000

The Fleet of the Fall River Line

The fleet of the Fall River Line passenger service consists of five superb steamers, the Commonwealth, the Priscilla, the Puritan, the Providence and the Plymouth. They are the fastest, safest and most splendidly equipped steamers plying in American waters. Service between Boston and New York every day in the year.

It has been the endeavor of the Fall River Line in adding to the fleet to make each new boat faster, safer and more comfortable. The supremacy of the Fall River Line as a great transportation system is the result of this constant striving for improvement.

The steamers have double hulls, divided into water-tight compartments by numerous bulkheads, and are practically unsinkable. Every precaution that experience and foresight can suggest has been utilized by the Fall River Line for safeguarding its patrons.

Good Meals Served Aboard These Steamers

The restaurants aboard the Fall River Line steamers are famous for their cuisine and service.

Patrons of the steamers of the Fall River Line have come to expect that the restaurants of these steamers shall provide all the dainties and delicacies that the menu of the best hotels and clubs offer—and they are never disappointed. Here the business man or tourist may enjoy as sumptuous a repast and in as elegant surroundings as though he were dining in a Fifth Avenue restaurant.

For years the steamers of the Fall River Line have been renowned for the excellence of their cuisine. Travelers who have enjoyed the well-cooked and well-served meals on board have spread the fame of these floating hotels to all parts of the world.

The Fall River Line's New Two Million Dollar Steamer

No vessel heretofore built for service on inland waters is so large, so magnificent, or has so many comforts and conveniences as the steamer "Commonwealth" of the famous Fall River Line.

Convenience, comfort and luxury—these three attributes did the builders of the "Commonwealth" have ever in mind. They have achieved all three purposes well.

The "Commonwealth" is a luxurious hotel afloat and in every way is as comfortable as any conveyance and as safe as any conveyance on land. Of the little details of service that minister to the well-being of the traveler, no metropolitan hotel can offer more than the "Commonwealth."

A noteworthy departure from the ordinary steamboat is the placing of the dining room on the dome deck, fifty feet above the water. It is a delightful place to enjoy a meal.

A VIEW OF THE ATLANTIC FROM NAHANT

A few of the Hundreds of Places of Interest on the Lines of the Boston & Northern and Old Colony Street Railway Companies

TROLLEY NETWORK SURROUNDS BOSTON

Among the greatest of the world, in fact, the trolley network of Boston is the most extensive of any city in the world. It is a network of lines that radiate from the city center to the suburbs, and it is a network that is constantly expanding. The network is so extensive that it is impossible to list all of the places of interest that it serves. But it is a network that is constantly expanding, and it is a network that is constantly improving.

From Nahant, it extends one way to the city center, and from the city center, it extends another way to the suburbs. It is a network that is constantly expanding, and it is a network that is constantly improving. The network is so extensive that it is impossible to list all of the places of interest that it serves. But it is a network that is constantly expanding, and it is a network that is constantly improving.

ELECTRIC ROAD GREAT AGENT OF CIVILIZATION

Gives City Workers Chance to Live in Homes Where
Light and Air Are Abundant and to Go Back and
Forth Inexpensively, Quickly and Comfortably.
Matter Interests Every Citizen.

[illegible]

It is well known that the cost of these improvements has been very expensive. The East Boston tunnel, which was opened in 1903, added to the charges for rental which the company has to pay. This item in 1908 was \$168,000.

Continually expensive tunnels and subways have been a major drain on the city's treasury. Expanded transit projects nearly all are in the planning stage, and the city is not prepared to take on more. "It is hard to see how it will be solved that there might be a new transit system," says a city spokesman. "The million looms before us, and we have to live with it." If a subway and bus rapid transit system are built, the city will have a large part of their debt going toward the transit system. "We have to be realistic about the future of business, there is revenue for the city," says a spokesman. "The city's economy continues to grow. A proportion of the city's revenue is used to pay the cost of the underground passages to deal with the traffic problem." The city is not sure if two bus lines will be used in the future. "If we have a new transit system, there won't be enough left for payment of several wages to employees of the transit system," says a city spokesman.

of Mr James Dalrymple, head of the privately-owned traction system of Glasgow. Mr Dalrymple, who had been induced to come to this country to pass upon the feasibility of electric traction, was struck by the possibilities of electric traction in Glasgow.

[illegible]

time of the rain was speeded up without the system when the horse cars were removed from the line. The electric power was doing the work. In 1887 the West End was the motor of 10,000 horses, a large proportion of which might at any moment be taken away as the driver that now runs.

[illegible]

When an electric railway company carries a passenger over a long distance say 10 miles, for 5 cents, it loses money on him. The theory of the uniform car fare is that the number of people who ride only a few blocks will offset the number who get the benefit of traveling seven or

[illegible]

There are two main causes for this increase of the average bus load. One is the fact that the urban population is concentrated in a few districts and suburbs. The other is the expansion of the factory and office districts.

It is difficult to see how the city government could not realize the extent to which the urban transportation company could be expected to contribute to the development in making it possible for people of moderate means to live where they are working. The government could have been carrying passengers out to reduce the bus load. The government could have been carrying passengers out to reduce the bus load. The government could have been carrying passengers out to reduce the bus load.

The other lines between Boston and British ports are the Warren Line to Liverpool,

also used to keep the staterooms cool when the ships are in sultry tropical seas.

RESPONSE TO GOOD ACHIEVEMENT OF YOUNG MEN'S CHRISTIAN UNION

Doors of Famous Boston Society Wide Open to Young Men of Every Denomination, Without Regard to Creed, Color or Nationality—Thousands of Persons Benefited by Its Outside Work.

By FRANK L. LOCKE.

drawn from among the now regular established departments of the Union's more general benevolent work.

The Boston Young Men's Christian Union was established in September, 1851, as a "new institution," a union of all sects and parties for the practical cultivation of "loyalty to God and man," and especially for sympathy to the young man just starting in active business and in need of wholesome comradeship and the friendly counsel of the more experienced. It invited the co-operation of clergymen and people of all denominations of whatever name and persons of every sect and party.

The institution was a new departure, it lived true to its principles and for a period of a dozen years it was a great success. Its work was suspended on account of the anti-engrossing interests of the Civil War.

After the war, interest in the Union again revived, and a public meeting was held in the Boston Theatre under the auspices of the Baptist Conference of Christian Churches. Addresses were made by Rev. Samuel H. Winkler, D.D., of New York, and the Rev. George L. Thayer.

At this meeting some 200 young men attended. The meeting was a great success, and the Union was reorganized. In 1868 a complete reorganization of the Union was effected, with William H. Baldwin as president. The Union was reorganized, and the Union was reorganized.

After the reorganization in 1868, rooms were occupied at No. 12 West Street. These rooms were promptly destroyed and larger premises were secured in the Fall of 1868 at 200 Washington Street.

At this meeting some 200 young men attended. The meeting was a great success, and the Union was reorganized. In 1868 a complete reorganization of the Union was effected, with William H. Baldwin as president.

Some idea of how Boston appeared in the days of the Revolution may be gathered from the impressions of travelers of that time. "I was told," says one, "that I was going to see the person of the most famous man as the person of the one who have left such a name, and I was told that I was going to see the person of the most famous man as the person of the one who have left such a name."

whole length it communicates a pleasant view with the principal street of the city, which is long and wide, and is flanked on both sides by a row of trees, many fine houses of two and three stories. The appearance of the buildings seems strange to European eyes, being entirely of wood, and having a style of architecture quite different from those of our continental neighbors. The houses are large and well lighted with many windows, and the roofs are covered with a pine, and it is quite cool at night. The interior is painted generally of a grayish color, which gives an agreeable aspect to the view."

[illegible]

Her Jurists Have Played and Still Play an Important Part in the Political, Social and Commercial Life of the Nation.

conservatism that

It would be impossible in a single article to cover adequately the many assignments the writer has seen Mr. Macchietti perform. He has shown himself to be a man of great initiative, planning his own work and directing others in the practice of his profession, but meriting the appreciation of a few to show that attorneys have played in the development of Boston.

It is generally admitted that the Macchietti family, more especially the father, were competent and able men, and that the lawyers of Massachusetts have played an important part in the framing of such legislation. Thus Hon. Roger M. Morse, regarded as one of the leaders of the Boston bar, was a member of the committee on the part of the House of Representatives in 1850, when he became chairman of the committee on Judiciary, which carried with it the leadership of the lower branch of our Legislature. Mr. Morse has represented our district in the House of Representatives for many years, and has shown the highest consideration as an attorney having one of the finest legal minds that Massachusetts has produced.

[illegible]

A prelude to Mr. Fow's bill in the office of United States Attorney was David B. Jones, a Hartford lawyer, a member of the firm of Hartford and Jones, who was in charge of the bill. Mr. Jones said that the bill was drafted in the office of the United States Attorney, and that it was the intention of the United States Attorney to introduce it in the House. Mr. Jones said that the bill was drafted in the office of the United States Attorney, and that it was the intention of the United States Attorney to introduce it in the House. Mr. Jones said that the bill was drafted in the office of the United States Attorney, and that it was the intention of the United States Attorney to introduce it in the House.

Looked on as Nestor of Boston Bar.

The people of Casey, like its white public speaker Joseph P. Casey, were not consistent in the Culture Wars. Casey, a lawyer, had been exonerated on some of the most important prosecutions that were undertaken by that office. The common law pleading will in vogue in the federal courts requires the greatest exactness in the drawing of indictments. Mr. Casey was everywhere recognized as an authority in the matter of criminal pleading, and he enjoyed the rare distinction of being every one of his indictments signed by the court. He was a member of the bar of the United States Supreme Court, and joined the firm of Maclean, Casey, Jones & Darling. Mr. Moody's law firm, which was then being United States Attorney and Mr. Darling United States Marshal. The drama now consists of Messrs. Casey and Jones, Mr. Moody

only Democratic member of that body, he has been fervent in the expression of his opposition to the policies of the majority party. He has been particularly vocal in his opposition to the numerous tariff acts that have marked his career as a public official. These have been inspired in the practice of his profession as an attorney in the city of Boston.

The activity of the large promotion has been by no means confined to the public service. The names of lawyers are found identified with almost every conceivable form of business enterprise and activity. Attorneys have been prominent in the development of the railroads, the steamship lines, the corporations, manufacturing plants and other industrial and commercial enterprises. On the board of directors of the International Trust Company is Robert M. Mues, Harvard E. Butler is a director in the Medical Trust Company, and John H. Mues is a director in the National Trust Company. Frank, a director of the National Shavings Bank and the People's National

John E. Kerkorian, a partner in the Elmer Chevrolet Company and treasurer and director of the New York Mining Company, Louisiana, is president of the American Automobile Manufacturers Association. Howard P. Butler is one of the Bay State Leasing Company, in addition to being president of the American Leasing Corporation, New York. He is on the board of directors of the Coastal Properties Company, Inc., Gulfport, Miss. and the Gulf Coast Properties Company, Inc., Gulfport, Miss. Raymond C. Hall, president of the Hallmark Company and the North Bay Wharf & Terminal Company, San Francisco, is president of the American Shipbuilding Company, secretary and director of the Plinkner-Wagner Company and Elmer H. Hall, president of the Hanger Bros. Company and a director both of the American Shipbuilding Company and the Plinkner-Wagner Company. The latter company's Robert A. Hall was one of the signers of the Missouri Manufacturers Insurance Company and is today its vice president and treasurer.

Frederic W. Hardest, an Assistant United States Attorney from 1871 to 1880, is a director and attorney for the Elmer Chevrolet Manufacturing Company, Elmer, N. Y. He is president of the American Automobile Manufacturers Association. Mr. Hardest has made the manifold operation of such plants—covering 100,000 sq. ft. of space—into a business of 100,000 sq. ft. of space. He is convincing many of his fellow-workers and many high-level executives that much of the legislative waste at such companies was avoidable.

Represent Large Corporations

is Chas. Lester Bancroft, who is the legislative counsel for many of the textile industries. He is president of the Arkwright Club and is well known as the lawyer of several large corporations.

Franklin H. Cox of the firm of Conkey & Sherman is best known for his success as a plaintiff's attorney in the first of two cases. This was the case of *Wright v. The City of New York* and the trustees for the city. Cox was then a young man, and he was able to bring together all the other attorneys of Boston put together. He has been very successful also as the attorney for the defendant in the trial of criminal cases. He has been successful in many cases, and he is a very successful business lawyer.

One of the attorneys who have achieved distinction by engaging in general practice, and whose efforts have not been limited to any branch of the law, is of course, extremely rare. The most successful, perhaps, in this respect, is the late Mr. John H. Smith, who was a very successful lawyer in connection with the City of New York. An enthusiastic member of Yale, he recently entertained a large number of visitors from the city of New York, and he was a very successful lawyer. He was a very successful lawyer, and he was a very successful lawyer.

Benjamin N. Johnson, a leading citizen of New York, formerly chief clerk of the Commercial and Industrial Bank, is President of the Lyons Institute of the City of New York. He is a very successful lawyer, and he is a very successful lawyer.

Lyons Institute of the City of New York

Candidate for District Attorney

Specialty of mining and corporation law. He is counsel for the Alvarado and the Santa Fe and Rio Grande railways, and is also counsel for the American and a large number of other mining and corporation interests in the West and in Mexico. He was chief counsel in the reorganization of the Pacific coast of Mexico and the reorganization of the Panama Canal zone in 1904, and in 1906. He is now president of the Panama law firm in Boston.

Walter Perry is one of the best known and the highest law firms in the United States. He was a famous assistant attorney at Harvard, and was graduated both from the law and art law departments. He was one of the founders of the law firm of Perry, Smith and Company, which was later merged with Alfred Livermore. Another young attorney and Harvard graduate who has achieved distinction is William K. Murry. He has been a number of times a member of the House of Representatives, and has been twice, two years in the House of Representatives. He recently received the Democratic nomination to the Governor's Council from the district where he lives. He is a member of the law firm of Perry, Smith and Company, and is one of the members that are not in that body.

Walter and Verne likewise entered the political arena at an early age. Shortly after Verne's graduation he was elected clerk of the city of Woburn and later was elected Mayor of that municipality. He was

The positions held by Howard F. Butler on various banking directorates

average attorney has absolutely nothing to do. In 1902 the firm of Phillips, Van Kleeen & Fish was formed, the members of which were all experienced in this exacting brand of their profession before they entered into the partnership. Benjamin Phillips, a graduate of Dartmouth, has appeared in many important cases involving the infringement of patents and is regarded as an expert by inventors in new industrial enterprises and by business men engaged in those industries where patent rights play an

was unusual degree, and because of his fairness and judicial maxims, his capable control frequently drew upon him as author, narrator or referee in the settlement of the disputes of the Middle West, for Association.

He was a man of great force, he has a sense by itself. It is a subject which not our answer in a hundred he finishes, one of the people who has an extreme naturally partly is the first of Carver, Washburn and Huddell before that partnership was dissolved. Mr. Washburn was one of the younger members of the bar who has won an honorable post in the law. He represents several fire insurance interests as well as the Mutual Life Insurance Company.

John F. McDonald, another graduate of Dartmouth, is engaged in a general practice that keeps him constantly in the courts. He is at present in the city of New York, where he has been practicing for some time. He was not unexpectantly selected for that important position because it was felt that a gentleman of his clean and aggressive type would tap into the

both of them a- do their motto prevail.

"The moving picture is not a shift for the playhouse, its dignity, greater, its importance far beyond its primary function of comedy and tragedy. It is a clean entertainment that teaches nothing harmful and is the lightest type entertainment in the history of the world. Its value cannot be measured now, but another generation will have grown largely from the joys of today's realism."

For more than 200 years Ku-Ku-Ku has been a boon for humanity's ills.

The first pre engine bolt in Boston was
 a track bolt found by David Wheeler a black
 smith in Newbury on Washington street
 It was found on Aug 21, 1766, and

Among the customs in the early days of Houston was that of the watchmen carrying the time of night and making a report of the weather as they went their rounds. This practice was not abolished until the late 1800's, when the city of Houston was founded.

In 1741 the town house and a mercantile house both of brick, and a hundred doors, 120 were burned. In 1750 a conflagration consumed all brick houses, shops and churches and over 1,000 people were injured and killed. But these and other subsequent conflagrations were eclipsed by the great fire of 1872, which involved a loss of over \$5,000,000. The energy and resource of the citizens of Boston are shown by the fact that after this fire the burnt district was entirely rebuilt in a little over two years.

of the Communist Party of the United States, which is the only party in the world that has a program for the complete abolition of the wage system. The party is the only one that has a program for the complete abolition of the wage system. The party is the only one that has a program for the complete abolition of the wage system.

The Lining Series and New England The Bunker Hill Breweries products are consequently to America what the brews of Pilsen and Guinness are in Great Britain—the standard of excellence.

The history of the Bunker Hill Breweries goes far back into the history of brewing industry in New England. It is part of the history of a house of fame and achievement. In 1820, John and Mary William of Lynn, Scotland, owned three breweries in Lynn, Massachusetts. One of the breweries was concentrated into a factory of

one of the most important requirements in rearing a good bee is a plentiful supply of pollen. Honeybees in New England have been particularly favored, but the native species, such as those affected by honeydew, are not so fortunate. In some cases, the bees are forced to use the pollen of other plants, and this is the case with the honeybees of the United States. In the case of the honeybees of the United States, the pollen is often of a different quality, and this is the case with the honeybees of the United States.

A. A. Van Nieuwen is a believer in and a practicing He is now, as he was in his younger days, a firm believer that his "strongest" should be of art and in doing so, he is a great man. He put out a lot of work, and he is a great man. He put out a lot of work, and he is a great man. He put out a lot of work, and he is a great man.

Fame of Frank Jones Ales, Brewed at Big Portsmouth Plant, Extends Over Whole World

The fame of the Frank Jones ales has extended all over the world. The ales are well known in the United States, Canada, and throughout the British Empire. The ales are brewed at the Big Portsmouth Plant, which is the largest and most modern of its kind in the world. The plant is situated in Portsmouth, New Hampshire, and covers an area of 12 acres. It has a capacity of 500,000 barrels a year and employs about 300 people in the various departments. The ales are brewed from the purest and finest materials, and are of a superior quality. They are sold in all parts of the world, and are highly appreciated by the public. The Frank Jones ales are a great asset to the community, and their fame is well deserved.

The company has its own cooper shop where all of its casks are made, and also its own water works at Newington, N. H., where it obtains the purest of spring water, and has in addition a water softening plant. All the water used in the plant is from these sources. As is generally known, the Frank Jones Brewing Company is the only company in New England which owns its own railroads and makes its own fuel. It is also the only company in the United States which is capable of producing a full standard of quality demanded when the malt obtained in the open market is used. The plant is situated in Portsmouth, New Hampshire, and covers an area of 12 acres. It has a capacity of 500,000 barrels a year and employs about 300 people in the various departments. The ales are brewed from the purest and finest materials, and are of a superior quality. They are sold in all parts of the world, and are highly appreciated by the public. The Frank Jones ales are a great asset to the community, and their fame is well deserved.

and history, the "Dark Lake" recreation in keeping with the work of the territory as a whole. In Lake Waukegan, the city is for the masses, and it is planned for the masses. Improvements to the lake will be made in the future, which form a part of the program, which form a part of the program, which form a part of the program.

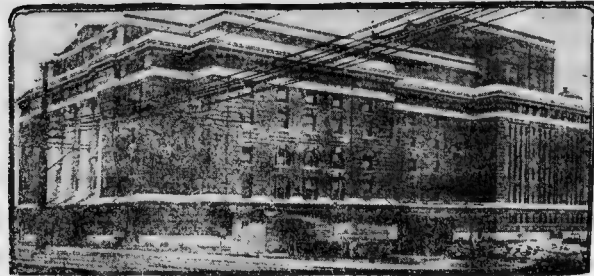

Mr. Madison was from Illinois and had broken everywhere by parks, and forests, lakes, ponds and streams. It is a beautiful area, and it is a beautiful area, and it is a beautiful area.

Mr. Madison thought that the city should not realize the grandeur and the extent, variety and beauty of their park. Few of them have been over it. Still fewer strangers have had the time to come the miles and miles which must be traveled to inspect it all. But those who do are astounded, not alone at the beauty of the place, but at the fact that it is not a park, but a city. It is a city, and it is a city, and it is a city.

ONE STORE IN 1883—26 STORES IN 1909. Does not the remarkable growth of this business impress upon you the fact that our success is due to a proper foundation? A Foundation of Square Dealing, High Quality and Low Prices, laid in 1883 at the opening of the first store. To-day the same policies guide the business, and in every one of our 26 stores in Boston, New York, Brooklyn and Newark you are assured of courteous treatment, the lowest prices, the finest grades of Drug Store Goods and the Riker-Jaynes guarantee of satisfaction on every article.

There are some good, sound reasons why you should give your business to every one of our 7 departments.

RUBBER GOODS

Latex, gutta, and all other rubber goods. Expert at repairs to all rubber goods and tires. Trained nurses for women and children.

TOILET GOODS

Toilet preparations and sundries from every manufacturer of note in every part of the world. We are importers, therefore sell the highest class of goods at lowest prices.

DRUGS

Drugs to be active must be fresh. We sell more drugs in one day than most druggists do in 6 months and all at prices far below the market. Make prices lowest possible.

PATENT MEDICINES

We carry every known preparation, and more, in a price to stock, every new article as soon as it is introduced. In many instances we buy cheaper than jobbers and give you the benefit of our saving.

SODA

Supplies for home private model fountains. Rich milk and cream. Fancy eggs. Fruits and syrups without preservatives. Sanitary fountains and excellent service.

CIGARS

We take pains to keep our cigars in uniform, perfect smoking condition. Our Riker-Jaynes Pure tobacco—enjoy a sale of a million and a half annually.

CONFECTIONERY

We are sole Boston agents for Gullitt's \$1.00 chocolates. Also carry every popular make of confection in a variety of prices.

RIKER-JAYNES DRUG STORES

You are SAFE when you buy at Riker-Jaynes.

May Be Had at all Music Stores.

The Henry F. Miller Of Today

Are the concrete expressions of the lofty musical and artistic ideals of the founder of the business, Henry F. Miller, Senior, which for nearly half a century have been consistently followed by his sons and grandsons who have succeeded him. There has been no alliance with commercialism, no compromise with mediocrity, and the simple, unswerving determination to produce the most perfect pianos possible, regardless of cost, has created instruments which are conceded to represent the highest standards known in piano making. They embody the true spirit of all that is best in what Boston is striving for.

THE
WALTHAM
WATCH
WORKS
WALTHAM
MASS.

OVER 4,000 WORKERS DAILY TURN OUT 3,133 WATCHES.

Great Waltham Watch Works Typify the New Industrial Order of Ideal Conditions.

Where you will throughout these old New England States these days and you will hear much talk of the future and what it holds in store for Yankee land. Whether it be in village, town or the great industrial capital, rich Boston itself, the leaders in every sphere are forecasting coming events. There is general acceptance of the dictum that if the future is to compare with the mighty past, we of New England must make full use of our greatest asset, our people. That done, all the glories of the days gone by will not only be equal, but far surpassed.

Already in a score of cities in the six sister Commonwealths great modern industries, built on modern lines, point the way. There, in ideal environment, with well-paid, intelligent operatives, keeping the old standards of Yankee skill and craft well in the forefront in this latter-day industrial struggle, great workshops have arisen in the new order of things.

Out in Waltham, twelve miles from Boston Common, there is one such vast establishment, which, perhaps more than any in the United States, typifies this new industrial order. There, in a huge crystal palace of the arts and industries, surrounded by beautiful parks on the banks of the Charles River, is the mighty plant of the Waltham Watch Company, from which for fifty years and more the finest watches ever made have been flowing in a steadily increasing stream to the markets of the world.

Surrounding it in the beautiful little city of Waltham are the happy homes of the more than 4,000 operatives, many of them not only owners of these homes, but with three generations of watchmakers have come, but of good bank accounts as well.

Belamy in his Utopian studies of the future created nothing more ideal as a workshop for the people of the times to come than now exists in Waltham, a pattern there for all New England and a grand augury for the future. Inside all the splendor of the two decades just passed, with much of the old Yankee stock emigrated into the West, their places largely taken by an alien population, Waltham is to-day almost 100 per cent, native Yankee stock. Of the four great industrial regions which make up the working force in this vast plant, not less than 85 per cent. are of old native stock, and a century's training for themselves and their ancestors, most highly skilled artisans on earth, finds its expression in the watches they make.

Were the better wings of the great Waltham factory to be put aside by the city, the factory, with an average height of five stories, would extend half a mile. It is one vast, crystal pile, with something like 4,000 windows, and with its beautiful park, it might be taken for a great colonial building, such is the atmosphere of quiet, order and cleanliness. Naught of the grime and noise of the average urban plant is seen. That freedom from dust so essential in a watch factory is achieved completely.

When the noon bell strikes and the doors open to let the vast army of workers out for the midday luncheon, the transformation is almost incredible. In every direction, laughing and chatting, hundreds of rosy-cheeked girls, athletic young men, looking for all the world like students coming from their classes, hurry on their way. Well dressed, with that characteristic swing of the workman who is untroubled, there are an inspiration to the observer. Occasionally in the crowd one sees a woman with silver locks or perhaps a man well along in years. There are not a few such, who for fifty years have given allegiance to this, their alma mater, and are yet among the most valued workers.

The policy of the men who have founded and built up this great industry has ever been to live and let live. As

in the last ten years for use of compressed air has made possible improvements in the machine, which now do everything else that, and they were even to do that. Who but the inventor himself can gain more than a fragment of comprehension of a mechanism which makes more than 1400 operations on an infinitesimal bit of metal before plating it to take its place in the completed watch? Standing beside one of the marvellous complex creations, one is appalled by the genius which created it, even as one derives the promise one feels humble in the presence of the great. A bit of a red plate no larger than a silver dollar or it may be a metal speck as great as a pin's head, is selected by one of the many "transfer" arms, and swiftly deposited in front of some tiny little steel pressed against a tiny, whirling saw and from one stage to another, with more than human accuracy, arms swiftly pass it on to the completed stage as a major part of the watch or a tiny screw or pinion.

Perhaps the most wonderful bit of transformation in the making of the watch is the making of the "balance". From the very finest steel wire which can be obtained a slanting wire is drawn, and the balance is made of this wire. Some of these take as much as two years to build and

work with incredible speed and accuracy. The balance is made of a piece of steel, which is heated to a red heat and then cooled in a bath of oil. This process is repeated several times to ensure that the balance is perfectly uniform. The balance is then mounted on a tiny screw, and the watch is assembled.

THE ORIGINAL WALTHAM FACTORY WHEN BUILT ON THE SAME SITE AS THE PRESENT FACTORY IN 1854.

and parts making a hair-like hair, will work so carefully without breaking, while the most skilled artisan could not make one such drill last for more than twenty-five operations by hand work.

Two great inventions make these miracles possible. The late Isaac D. Smith, inventor of the "slide rest," an attachment of the lathe which carries the work, and the rotating cylindrical turret, which carries the tools. By means of the "slide rest" the work is held so steady that the movement of these parts, without any mechanism and work.

The most great invention in the world is the "slide rest," which carries the work, and the rotating cylindrical turret, which carries the tools. By means of the "slide rest" the work is held so steady that the movement of these parts, without any mechanism and work.

With all this perfection of detail and vastness of product, nothing like shipping is tolerated, for it is just half a year before a watch is ready to leave the factory. The watch is then shipped to the customer, and the watchmaker's work is done.

There they lay, long rows of them, in their steel cases, waiting for the day when they will be taken to the customer. The watchmaker's work is done, and the watch is ready to be shipped.

One of the wonders of the Waltham Watch Company is the fact that the watches are made in such a way that they can be taken apart and put back together again without any special tools or equipment.

Beginning in 1860 with 12,000 watches a year, the Waltham Watch Company has grown to be the largest watchmaker in the world, producing over 3,000,000 watches a year.

The one thing which, perhaps more than any other, has made the Waltham Watch Company successful is the fact that the watches are made in such a way that they can be taken apart and put back together again without any special tools or equipment.

MISSING HALF OF THE GREAT CULLINAN DIAMOND FOUND?

HOW THE FAMOUS GEMS LOOK IN THE BRITISH CROWN

QUEEN ALEXANDRA WEARING THE TWO PARTS OF THE CULLINAN DIAMOND LINKED TOGETHER

THE DIAMOND AS IT IS DIVIDED INTO A SQUARE BRILLIANT PENDANT.

IT is well known that the Cullinan diamond, presented to King Edward by the South African Colonies, though incomparably the greatest diamond in the world, is only part of a complete stone, and probably the smaller part of it.

The Cullinan diamond as found weighed 3,106 3/4 karats, or over one and one-third pounds. How enormous this is may be judged from the statement that the celebrated Kohinoor diamond weighs only 102 1/2 karats.

The Cullinan is a very long and rather narrow stone, and from its slenderness it is judged that the missing portion was considerably larger. Now a report comes from Johannesburg, South Africa, that the larger portion was discovered by natives soon after the other and removed by them to the Mogato fastnesses of Zoutpansberg.

The report further says that a prominent Dutch diamond dealer has secured the missing portion by offering a reward of \$5,000 to the natives for its return. If this is true, he has made a remarkable bargain. The diamond is said to be now in Johannesburg, but much privately.

The Cullinan diamond was found in January, 1905, and was named after the head of the company which owns the Premier Diamond Mine.

It was so named because it was so difficult to get out of the mine.

This difficulty was settled when the South African Colonies, including the late Boer republics, decided to present it to King Edward as a token of peace and reconciliation after the war. The price paid—\$4,000,000—was far below its theoretical value, but the

(Continued on Next Page.)

Winter Foes of Beauty

By Mme. Lina Cavalleri.

THE girl who has come through the summer ravages of beauty unharmed, or with blemishes which she has been able to remove, has now to face winter's menaces to beauty. It is, as one of your most favored and favorite blonde beauties in America, Lillian Russell, has said, "hard work to be a beauty."

In summer the menace to beauty comes in its gay, shining aspect. In winter there is danger that it will become coarse-textured and unbecomingly reddish.

In summer the hair's luxuriance is threatened by excessive perspiration of the head. In winter the wind is likely to make it harsh and dry.

Summer brings tan and freckles, but winter brings with it, unless the circulation be perfect, a curiously mottled appearance that is most unbecoming.

In summer sand and dust threaten to rob beauty of the eyes. In winter the cold winds redde them.

Summer brings out the humors of the blood in hives and other disgusting rashes. Winter bestows the unwelcome gift of a scurvy cold.

Summer excites the hands and leaves its trace in tan or freckles or both, but winter cools and reddens them.

Beauty must be on guard against winter as well as summer, for both seasons are a foe to destroy it.

I have found that, while I may protect my skin, my eyes, my hands somewhat from the winds of winter, my hair always suffers from it. The wind I found dried the scalp, making it harsh and brittle. Every massage and brushing I did not find as useful as in the summer. I tried many remedies for the dry condition of the scalp, which, of course, produced dry hair. At last I hit upon a remedy which I rubbed well into the roots of the hair before retiring at night before my shampooing day.

**Lanolin, 1/2 oz.
Sulphur, 1/2 oz.**

Let me explain. I did not rub this mixture into the scalp. I have seen women do a hair wash, rub it on as carefully as when the scalp, here and there, that they might quite as well have left it undone and unhelped. I had time for better purposes.

"Hold the long hair near the roots so that rough combing will not pull it out."

as thoroughly as I think, and washing my undergarments should be done.

First, I combed the hair thoroughly, doing it slowly, beginning about an inch from the ends, holding the long hair near the roots as that rough combing might not pull it out. Then I brushed it slowly, beginning at the roots and brushing downward with long, slow strokes to the very end. I parted the hair into six or eight, combed it smoothly away from each little parting.

Then, with fingers dipped into the mixture of lanolin and sulphur, I began at the hair line and with firm, long strokes, the motion which was to loosen the skin from the scalp. I rubbed the mixture well, then the roots. From the hair line I followed the partings to the crown from which it radiated. This done, and thoroughly done, I combed my hair and coiled and brushed it once more, and allowed it to hang loose for an hour or more, exercising and ventilating it, until I retired, when it was braided and tied into two large, loose braids and left at the end with narrow ribbons. I never use either elastic or thread to fasten the end of the hair, for I think it breaks the hair, making the ends uneven.

The next morning I have a shampoo. Ordinarily I use an ordinary shampoo, a little of white castile soap and warm water. But just now, noticing the drying effects of the cold winds upon my hair, I try to use the shampoo which will aid in making the hair soft and lustrous during for the time the formula is an aid when the skin shows a work of the natural oils, which seem to have suspended operations.

**Yolk of 2 eggs.
Warm water, 1 qt.**

I part the hair into fifty strands, as I have described, the night before, and into each of the partings and particularly arouse the

hair the wind & women cannot afford to neglect it. I rub the tips of the fingers, with the yolk of the eggs, using the tips of the first two fingers. When it is done, they roughly done. I rub the hair and scalp to warm water. After the hair has been through the first washing, I then, upon the scalp a spray from a small container of the mixture, which I apply with my fingers. This I do, once the water has been and the face is not so great as when it is removed from a pitcher in the middle of the shower.

I use the oil of the water, not having any soap on the under scalp. The oil serves as a soap and a good solvent for the beauty materials of washing. I do not believe in the use of soap, but I do not believe in the use of soap for the hair. I have seen the hair of a woman who had used soap for the hair, and it was so dry and brittle that it was impossible to comb it. I have seen the hair of a woman who had used soap for the hair, and it was so dry and brittle that it was impossible to comb it.

To counter the coarse, drying effect of the winter which I use more than the summer quantity of cold cream.

In brush cold reddened hands, wash the hands in warm water softened by a few drops of ammonia.

Winter is a greater period of wrinkles than summer, because it dries the skin. The wrinkled skin is always a dry skin. This formula is an aid when the skin shows a tendency to dryness:

**Oil of sweet almonds, 60 grams.
Cocoa butter, 12 grams.
White wax, 8 grams.
Spermaceti, 12 grams.**

For a few complexions cocoa butter is an

No. 44: WINTER FOES OF BEAUTY

BY
Mme. Lina Cavalleri,
the Most Famous
Living Beauty.

TODAY Mme. Cavalleri's topic is the timely one of "Winter Foes of Beauty." She tells her readers how to treat the wind roughened hair which is one of the blemishes of beauty in winter. She gives advice about the treatment of wind reddened eyes and cold-coarsened complexion. The article also contains valuable formulae, some of which are of Mme. Cavalleri's own invention.

Next week Mme. Cavalleri will write of "Exercises Good and Bad." She will describe the exercises that will awaken a torpid liver; the exercises that will straighten round shoulders; harden the sagging abdomen; clear clogged lungs, and many others that are corrective and strengthening.

"If the wind blows irritating particles into the eyes bathe them in an eyecup filled with warm salt water."

For the eyes, bathe them in an eyecup filled with warm salt water.
